PROFILE

Computer Science graduate with experience in both data engineering and data analysis. Focused on transforming data into actionable insights that support decision-making.

PROFESSIONAL EXPERIENCE

Full stack developer

11/2024 – 01/2025

Developed a full-stack Employee Management System using SQL, semantic HTML/CSS, and C#.

EDUCATION

Bachelor's degree Computer Science

Imam Mohammed bin Saud University

Nanodegree of Data Analyst

Udacity

Nanodegree of SQL

Udacity

Nanodegree of Data Engineering

Udacity

LANGUAGES

Arabic — Native/Bilingual

English — Proficient

SKILLS

- ETL/ELT
- Data Wrangling
- Data Cleaning
- Business Intelligence
- Data Visualization
- Microsoft Excel

PROJECTS

Data Modeling and Querying with Apache Cassandra

Built a high-performance NoSQL data model using Apache Cassandra with CQL, focusing on scalability and query efficiency.

Data Warehouse

Designed a cloud-based data warehouse on Amazon Redshift to analyze music app user activity using ETL pipelines and star schema modeling.

Data Lake Project

Built a data lake using AWS (Glue, S3, Spark) to process and analyze customer balance and motion sensor data, ensuring data privacy and supporting curated insights.

Data Pipeline Orchestration with Apache Airflow

Built a modular ETL pipeline using Apache Airflow to load and transform data from S3 to Redshift, including custom operators for staging, loading fact/dimension tables, and data quality checks.
