Professional Summary

Analytical and impact oriented Data Analyst having worked with fintech and e-commerce data and experienced in analyzing and visualizing data to impact business decisions. Proficient in SQL, Python, Power BI, and Tableau, with hands-on experience in data Manipulation and cleaning, KPI reporting, and building end-to-end BI solutions. Microsoft-certified in Azure Data Fundamentals. Recently relocated to Saudi Arabia and open to both on-site and remote opportunities with data-driven teams.

Technical Skills

Languages: Python, SQL (MS SQL Server, MySQL, Oracle SQL), pandas, numpy, Scikit-learn, matplotlib

Visualization & BI Tools: Tableau, Power BI, Looker Studio (Basic Knowledge) **ETL & Data Workflow Tools:** Talend Open Studio, Airflow (familiar)

Other Skills: Data Analytics, Data Pipeline Design, Process Optimization, ETL Design, data modelling, github, git

Work Experience

Love for Data | Data Analyst / Senior BI Specialist | Karachi, Pakistan | Mar 2022 – Nov 2023

- Alamthal Financing | Fintech solution provider located in Riyadh, KSA | Data Quality Assurance Project (Banking and fintech)**
 - Cleaned data and performed data audits on multiple **financial** databases containing **millions of records** and over **50 variables from 4 different data sources** using Oracle SQL, MS SQL Server, python and Excel to ensure that the provided data conforms to the banking data rules in accordance with **DIMC Scoring** (Data Integrity, Maturity and Completeness)
 - Shortlisted relevant data tables for Business Intelligence reports based on client's requirements.
 - Thrifty | Ireland and UK | Ecommerce thrift store (Sales and eCommerce)**
 - Implemented ETL processes and deployed them to Azure Function App Service (function app), that reads data from Azure blob storage (data storage) and processes it for the KPI metrics in MS Power BI dashboards (Cloud computing)
 - Cleaned and visualized **100k+ sales** transactional data in SQL and python, discovering key insights such as **2X increase in total transaction value and average order value (AOV)** from multiple charity warehouses post-covid (data analysis). Also, catered ad hoc client requests.
 - Performed data audits for revenue assurance, ensuring data accuracy and consistency for calculation of key performance Indicators such as **Net income and Total sales. Transformed data for Profit and Loss Statement** format in the dashboard.
 - Developed technical documentation for future reference and modifications and knowledge sharing through training sessions.
 - Improved data accuracy by 25% and bug fixes** to enhance dashboard performance, reducing **response times by 30%**. Visualized subcategory sales and stores comparisons in different countries through an interactive Power BI dashboard, **highlighting peak sales periods and identifying top selling categories** and subcategories that generated **80% of the total sales**. Resolved data inconsistencies and handled ad-hoc customer requests.
 - Kashat | Egypt based Fintech startup | Microfinance bank (Fintech)**
 - Cleaned and preprocessed **200k+** financial transactional data using MySQL and python, uncovering business crucial metrics like **default rate, loan disbursements and repayment ratio, customer demographics and cohort analysis**.
 - Developed custom KPI reports in Tableau, enhancing existing queries to improve dashboard response time by 70%, tailored to track KPIs such as loan repayments, loan disbursements, and default ratio, providing real-time visibility into business performance metrics.
 - Presented BI dashboards to stakeholders twice a week, ensuring up-to-date monitoring of critical business intelligence metrics.
 - Designed data flow on Tableau Server for seamless inter-server data migration, utilizing Talend Open Studio and Python for efficient data integration. Also, developed regression models for feature engineering.
 - Alif | Ecommerce BNPL platform with a fintech backend (MVP) | ML Model Design and BI Dashboard Project (Sales and Fintech)**
 - Contributed actively to the database design process for the ecommerce banking application using sample data structure from the client in PostgreSQL in collaboration with other team members to understand product analytics.
 - Participated in product management sessions with the client, contributing to the refinement of BNPL application features and roadmaps and led client requirement gathering sessions and conducted market research, identifying relevant data fields for dashboard development, employing enhanced techniques to analyze and refine project specifications, achieving a **20% improvement** in market penetration strategies and meeting client objectives effectively.
- SQA Engineer | Botsify, Pakistan | Mar 2020 - Feb 2022**
- Possess a product mindset that played a pivotal role in ensuring the quality and reliability of Botsify's products (Chatbots) by validating and verifying existing features' functionality through rigorous testing methodologies.
 - Automated testing procedures using industry-standard tools such as PHPUnit and Selenium webdriver, significantly reducing manual testing efforts and improving testing efficiency. Performed regression and smoke testing.

Academic Projects /Awards & Achievements

- Awarded for creating top-performing KPI dashboards for the credit scoring model at Kashat (Client project).
- Worked as a coordinator in conducting MS Power BI workshop at AGA Khan University Hospital, Karachi, PK | Mar-2023
- Microsoft Certified: Azure Data Fundamentals (DP-900)** | July, 2024
- Datalemur, analyst builder and Leetcode (Python and SQL) | Jan, 2024 - Present
- Mckinsey Forward learning program | April, 2024- October, 2024
- Analyzing Instagram hashtags for information systems analysis (Happiness related hashtags on Instagram) using web scraping (Selenium) and Python (Jupyter notebook).
- Rice Quality Analyzer Web Application: Developed using Python, Keras, TensorFlow, and Flask for model integration.
- Personality Prediction using Human Figure Drawing: Built and integrated DL model using Flask, MS SQL Server, python and Bokeh.

Education

NED University of Engineering and Technology
Masters of Science in Data Science

October 2020 – Sep 2022
Karachi, Pakistan
