

Ahmed El Kady

Director | Systems and Biomedical Engineering

Results-oriented Engineering Manager with a proven track record in driving operational excellence and patient care. Possessing a strong foundation in clinical engineering, project management, and service operations. Adept at leading cross-functional teams to achieve strategic objectives. Proven ability to optimize resource allocation, implement innovative solutions, and ensure regulatory compliance. Seeking a challenging role to leverage expertise in transforming healthcare delivery.

EXPERIENCE

Global Medical Solutions International (GMSI), Egypt

FEBRUARY 2022 - FEBRUARY 2025

Director Of Biomedical Engineering Department

- Transitioned a 700-bed public hospital to a high-performing private facility.
- Implemented advanced medical technologies across Cardiology, Radiology, and ICU.
- Managed equipment lifecycle, ensuring compliance with Joint Commission, GAHAR, and ISO standards.
- Built and trained a high-performing biomedical engineering team.
- Established quality management systems, including CMMS (IBM Maximo) for inventory control.
- Led initiatives to extend lifespan and enhance performance of critical medical devices.
- Collaborated with clinical teams to optimize technology utilization for patient care.
- Managed supplier and contractor relationships, negotiating cost-effective contracts.
- Developed and executed departmental budgets for financial sustainability.
- Attended international healthcare fairs (e.g., Arab Health Exhibition) for industry updates.
- Conducted annual appraisals based on performance and Key Results Areas (KRA).

As-Salam International Hospital, Cairo Governorate

JUNE 2017 - JANUARY 2022

Senior Biomedical Manager

- Led biomedical engineering departments of two healthcare institutions (ASSIH & KIH) with 420+ beds.
- Merged teams for unified equipment lifecycle management in Surgery, Emergency, and Pediatrics.
- Implemented CMMS (SAP) for managing 5000+ medical devices, enhancing efficiency and reducing downtime.
- Utilized data-driven decision-making for continuous improvement and optimized patient outcomes.
- Initiated projects to improve patient safety.
- Ensured regulatory compliance (Joint Commission) with zero non-conformities in ISO and JCI audits.
- Implemented a 24/7 in-house service team for timely response and support.
- Conducted monthly performance reviews and presented findings to senior management.
- Attended international healthcare fairs (e.g., Arab Health Exhibition, MEDICA) for

industry updates.

- Conducted monthly appraisals based on performance and Key Results Areas (KRA).

Misir Radiology Center, Cairo Governorate

DECEMBER 2016 - MAY 2017

Maintenance Manager

- Supervised engineering teams across three branches, ensuring optimal equipment performance and patient safety.
- Provided technical leadership for radiology equipment and peripherals.
- Oversaw daily safety testing, repair, and maintenance operations.
- Developed and implemented work policies and inventory management.
- Led efforts to reduce equipment downtime and improve maintenance processes.
- Served as a technical resource for staff, supporting equipment repair and maintenance activities.

ELARABY International Hospital, Ashmoun

JANUARY 2013 - NOVEMBER 2016

Head of Biomedical Engineering

- Led Biomedical Engineering Department for a 300-bed hospital, including planning, recruiting, and resource allocation.
- Established and implemented policies and procedures in line with JCAHO standards.
- Trained and supervised biomedical equipment engineers and technicians.
- Coordinated with governmental regulators on inspections and audits.
- Served as the primary administrative contact between Biomedical Engineering and other hospital departments.
- Managed overall operations, including staffing, budgets, and vendor services.
- Reviewed, audited, and made decisions on problem diagnosis, repair, preventive maintenance, and quality assurance of patient care equipment.
- Attended international healthcare fairs (e.g., Arab Health Exhibition) for industry updates.
- Conducted annual appraisals based on performance and Key Results Areas (KRA).

ELARABY International Hospital, Ashmoun

OCTOBER 2010 - DECEMBER 2012

Bio-medical Engineer

- Reviewed hospital functional programs and architectural drawings.
- Conducted healthcare planner meetings to determine medical equipment needs and evaluate existing facilities.
- Prepared technical specifications and budget estimates for medical and non-medical equipment.
- Developed procurement and bid documents, selected, installed, and commissioned medical equipment.

EDUCATION

Cairo University

JUNE 2005 - JUNE 2010

Bachelor, Systems and Biomedical Engineering

Manor house school

JUNE 2002 - JUNE 2005

IGCSE, Secondary Education

SKILLS

- Biomedical Engineering Management
-

- Team Leadership and Supervision
 - Medical Technology Implementation
 - Equipment Lifecycle Management
 - Regulatory Compliance (JCAHO, ISO, GAHAR)
 - Quality Management Systems (CMMS, SAP, IBM Maximo)
 - Technical Specifications and Budgeting
 - Procurement and Vendor Management
 - Performance Reviews and Appraisals
 - Healthcare Planning and Facility Evaluation
 - Patient Safety Initiatives
 - Data-Driven Decision Making
 - International Healthcare Industry Knowledge
-

PROJECTS

As Salam International Hospital - New Cairo

JANUARY 2021

- Planned, procured, installed, and tested medical equipment and utilities for a new hospital branch.
 - Created room-by-room lists, room data sheets, medical equipment specifications, and bills of quantities for each department.
 - Evaluated technical offers from suppliers, negotiated contracts, and oversaw the procurement process.
 - Ensured proper pre-utilities preparation for medical equipment by the contractor.
 - Conducted medical gas pipelines network testing.
 - Built and led a team of biomedical engineers and technicians to support the project and hospital operations.
-

ELOFOK MEDICAL CENTER

JANUARY 2020

- Involved in establishing a Urology & Andrology Center of Excellence in eastern Cairo.
- Designed the center, including space planning, budgeting, and medical equipment planning with utilities.
- Prepared technical specifications and compared offers from different suppliers of

medical equipment.

- Procured and commissioned equipment, ensuring quality standards and specifications were met.
- Trained end users on safe and effective operation and maintenance of equipment.
- Licensed the center, complying with legal and regulatory requirements of health authorities.
- Ensured operation rooms met quality and infection control standards.
- Utilized advanced technologies (laser, shockwave, endoscopy) for minimally invasive procedures.
- Provided luxurious inpatient rooms and suites with top medical care.

United Egyptian for owning and managing Hospitals -The Egyptian German Hospital (Under construction)

AUGUST 2016

- Participated in the primary design of the hospital, determining function location, patient maneuver, and cycle flow of equipment, staff, and patients according to guidelines.
- Planned medical equipment for each room, including lists, data sheets, and medical gas.
- Involved in budgeting, procurement, contract negotiation, pre-installation requirements, utilities, and follow-up of medical equipment and medical gas pipeline installations.
- Contributed to developing a state-of-the-art hospital providing high-quality healthcare services to the Egyptian population.

EL ARABY Hospital - Abu Rakaba - Egypt

OCTOBER 2010

- Provided input on space planning, medical equipment specifications, room data sheets, and medical gas requirements during design and construction phase.
- Coordinated with architects, engineers, contractors, and vendors to meet clinical and operational needs.
- Managed logistics of medical equipment delivery, installation, testing, and commissioning.
- Ensured proper receipt, inspection, inventory, tagging, and storage of equipment.
- Supervised installation and testing of equipment, verifying acceptance criteria and standards.
- Conducted end user training on equipment use and maintenance, developing training materials and schedules.
- Developed department policies and procedures for medical equipment management, aligning with best practices and hospital goals.
- Created a manuals library and electronic database for easy access to equipment documentation.
- Designed forms for equipment management, including requests, inventory, inspection, maintenance, repair, incident reporting, and evaluation.
