EDUCATION

2012 - 2015

PPERIYAR UNIVERSITY

- Bachelor of Computer Applications

2011 - 2012

C.S.I. HIGHER SECONDARY SCHOOL

SKILLS

- Installation and Configuration
Servers, Network devices
- Active Directory, Group Policies , DNS, DHCP, File Server, Printer Server
- Hardware and Software Installation
- Device Configuration
- Program Installations
- Virtualization
- Technical Support & Help-desk Support

PROFILE

Experienced Systems Administrator with a solid background in managing server infrastructures, data center operations, and IT support across both Windows and macOS platforms. Skilled in installing, configuring, and optimizing IT systems to ensure high availability and optimal performance. Areas of expertise include technical support, virtualization using VMware ESXi, Windows Server administration, Active Directory, DNS, DHCP, and network security. Proficient in hardware troubleshooting, system upgrades, application support, and data backup management. A proactive team player with strong hands-on technical skills and a dedicated commitment to delivering efficient, secure, and reliable IT solution

WORK EXPERIENCE

- **Bhima LifeSciences LLP** 2018 - 2024
System Administrator - ASM

Technical & Application Support

- Provided end-user support for 15+ enterprise applications, resolving technical issues and user queries both on-site and via remote assistance tools.
- Supported key client applications including Attune LIMS, RIS, SAP, Tally, Matrix (COSEC), and HR Payroll (Saral PayPack), ensuring smooth functionality and minimal disruptions.
- Managed software inventory and IT asset management; maintained accurate records of software installations, licenses, and hardware assets.
- Delivered comprehensive technical support through phone, email, and in-person interactions, covering both software and hardware-related challenges.
- Demonstrated strong hands-on technical skills in troubleshooting and maintaining desktops, laptops, printers, and other peripheral devices.
- Installed, maintained, and managed enterprise antivirus software such as Trend Micro and F-Secure Center Package, ensuring endpoint protection across the network.
- Monitored system components for performance and security; analyzed network, computer, and disk utilization, providing proactive recommendations for system optimization.
- Trained and supervised junior IT technicians, overseeing day-to-day support operations and promoting adherence to IT support standards and best practices.

Server Supports

- Set up, configured, and fixed issues with Windows Servers, including features like Active Directory, DHCP, File and Print Servers, and WDS.
- Installed and looked after PACS Server used for storing and viewing medical images.
- Handled setup and maintenance of storage servers, including SAS and NAS systems.
- Created user accounts in Active Directory, placed them in the right groups, and set access permissions.
- Used Group Policy to manage user settings, control access to files, and apply desktop rules.
- Built new servers, installed updates, and kept them secure and up to date.
- Fixed server hardware and software problems like slow performance, patch errors, and service crashes.
- Solved common issues like full disks, problems with scheduled tasks, and network connection errors.
- Managed regular backups and stored data safely to protect against loss and support recovery.

VMWARE exsi Supports

- Installed, configured, and maintained VMware ESXi 5.5 and 6.0 servers, and managed vCenter through the vSphere Client.
- Created and managed VM templates, and deployed new virtual machines (VMs) from templates.
- Exported and restored VM instances using OVF files via the ESXi client.
- Led ESXi and firmware upgrade projects across various server hardware platforms.
- Configured and maintained Network Attached Storage (NAS) servers within the virtual environment.
- Carried out system upgrades and migrations as per infrastructure requirements, and performed basic troubleshooting for VMware and storage-related issues.

Networking Supports

- Proficient in TCP/IP, DNS, and DHCP protocols.
- Experienced with hardware components including routers, switches, firewalls, and access points.
- Strong understanding of network security, including firewalls, VPNs, and security protocols.
- Skilled in VLAN configuration concepts and client VPN installation.
- Troubleshot and resolved critical/high-impact network issues, particularly in branch locations, using strong problem-solving skills.
- Coordinated with various vendors, the end-user support team, and onsite engineers to resolve network-related concerns

WORK EXPERIENCE

Medall Healt Care Pvt Ltd

2015 - 2018

IT Associate Engineer

- Installed and troubleshooted Windows operating systems, MS Office, Local Area Networks (LAN), and wireless network configurations.
- Configured and maintained firewalls, ensured connectivity, and provided remote support for software, printers, and other peripherals.
- Strong hands-on technical skills with personal computers, laptops, and peripheral devices.
- Experienced in managing shared folder access permissions and security.
- Coordinated with vendors to log issues and follow up until resolution.
- Installed, maintained, and managed antivirus software such as Trend Micro and F-Secure Center Package.
- Monitored and maintained servers and network devices, ensuring optimal performance.
- Utilized knowledge of VMware ESXi 5.5 and 6.0 servers, managing them through the vSphere client.
- Familiar with client applications and providing support for their usage and maintenance.
