ABOUT ME

I am a chemical engineer with 3 years of experience. I have spent 2 years in the manufacturing and distribution of energy conveyance products industry, specifically in the production department as a Junior Process Engineer, and 1 year in the fertilizer and mining industry as a trainee in the project section. I am seeking to work in a reputable organization as a chemical engineer to meet the organization's demands and fulfill the responsibilities of the position with full commitment, ensuring a grounded approach to my profession.

EXPERIENCE

INTERNSHIP

| 18/11/2024 – 30/11/2024 Kochi, India

ENVIRODESIGNS ECO LABS

- Gained the knowledge in working principles and operation of gas chromatography-mass spectrophotometry (GC-MS/MS)
- Trained in chemical Analysis of water, waste water, & gases

GRADUATE ENGINEERING TRAINEE | 14/02/2023 – 14/02/2024 Jodhpur, India

FCI ARAVALI GYPSUM AND MINERALS INDIA LTD

- Undertake diverse responsibilities in project operations, finance, and budget management.
- Collaborate closely with the project manager and team to develop and oversee organizational and program budgets.
- Respond promptly to emerging needs and challenges, addressing various tasks as they arise.
- Prepare detailed reports and presentations for multiple projects.

Key Projects and Reports:

1. Detailed Project Report on Single Super Phosphate Manufacturing
2. Presentation on Mineral beneficiation techniques for Rock Phosphate
3. Presentation on Sulfuric Acid Plant Operations
4. Study Report on Eppawala Rock Phosphate Suitability for SSP Manufacturing
5. Study Report on Mining Plans for Durmala and Maldeota Phosphorite Mines
6. Cargo Ship Container Types and Specifications Report
7. Policy and Regulatory Analysis, Economic Analysis for Biogas Production and Utilization
8. Detailed Project Report on Phosphate Rich Organic Manure Fertilizer Plant
9. Study Report on Potash Extraction from Nepheline Syenite Rock
10. Study Report on Solar Project Analysis
11. Study Report on Apatite Recovery from Uranium Tailings

12. Study Report on EV Charging Station Assessment
13. Prepared the proposal for Reconnaissance Survey (G-4 stage) for Copper, Lead-Zinc, Gold, and Silver in Uttarakhand.

JUNIOR PROCESS ENGINEER |15/12/2020 – 15/12/2022 Chennai, India

POLYHOSE INDIA RUBBER PVT. LTD, TAMIL NADU

- Batch Production Coordination, Process Improvement, Quality Testing, Process Monitoring, Inspection Management, Production Evaluation
1. Control Production process and ensure it is operating correctly.
 2. Train, deploy and handle casual workforce of max 30 people in shift
 3. Ensure schedules and productivity are adhered to commitments.
 4. Ensure that production is done as per 5S safety standards as per defined procedure & specifications
 5. Monitor and control the yield losses during the production process.
 6. Ensure high standard of housekeeping and cleanliness in process Area.
 7. Troubleshooting of the existing process
 8. Supporting to Stores Activities
 9. Ensure Stock Audit & issue Process in Production
