Professional Experience

- **IT Senior Project Manager / Service Delivery Manager | Ejada Systems** | October 2024 – Present

Job Description:

As an IT Senior Tech. Project Manager and Service Delivery Manager, I oversee the planning, execution, and delivery of complex IT projects while ensuring exceptional service delivery to clients. My role involves collaborating with cross-functional teams, managing client relationships, and driving continuous improvement in service processes.

Key Responsibilities:

- Lead and manage multiple IT projects from initiation to completion, ensuring alignment with business objectives.
- Develop project plans, timelines, and budgets while monitoring progress and mitigating risks.
- Foster strong relationships with clients and stakeholders to understand their needs and provide tailored solutions.
- Implement best practices in service delivery, enhancing operational efficiency and client satisfaction.
- Coordinate with technical teams to ensure seamless integration of services and solutions.
- Analyze performance metrics to identify areas for improvement and drive process enhancements.
- Mentor and guide project teams, promoting a culture of collaboration and accountability.
