Date of Birth: 06 June 1987

Religion: Islam

Gender: female

Nationality: Pakistani

Iqama Status: Transferable

Marital status: Married

Professional Summary

Dedicated and results driven by an environmental engineer with a proven track record in managing complex environmental projects and ensuring regulatory compliance. Proven track record of developing and implementing effective environmental management systems, ensuring regulatory compliance and driving sustainable practices. Adept at collaborating with cross functional teams and stakeholders to achieve organizational goals while promoting environmental stewardship. Excellent communication and leadership abilities with a commitment to continual improvement and innovation in environmental Practices.

Work Experience

1. Environmental Engineer | Albawani Construction Company LTD (KSA) | March 2020- still working

- Developed and managed environmental compliance, permitting, and evaluation efforts for a variety of projects.
- Developed hazard control programs to reduce contamination and accident.
- Collaborated with other engineers, and technicians in the development of strategies for environmental protection.
- Performed environmental assessments and audits of construction sites to ensure compliance with regulations.
- Created and implemented plans for hazardous waste management and disposal.
- Evaluated existing environmental management systems and developed recommendations for improvement.
- Conducted site assessments and monitoring of water, air, and soil quality.
- Oversee wastewater disposal and treatment programs.
- Conducted environmental impact studies on proposed projects.
- Provided technical advice to management on environmental issues.
- Identify areas of improvements to reduce environmental damage and waste.

2. Environmental & Sustainability Consultant | Environmental Management Development and Sustainable Solutions, Peshawar, Khyber Pakhtunkhwa, Pakistan | March 2018- Jan-2020

- Managed team of employees, overseeing hiring, training and professional growth of employees.
- Participated in team-building activities to enhance working relationships.
- Created plans and communicated deadlines to complete projects on time.
- Formulated and implemented long-range plan for environmental Programs.
- Managed development, design and execution of energy conservation projects.
- Performed environmental site assessments and provided remediation recommendations.

3. Senior Environmental Consultant | Sustainability Through Environmental Professional Services (STEPS) Islamabad, Pakistan | March 2016 - Jan 2018

- Performed Environmental Site assessments and Provided Remediation Recommendations.
- Managing employees and their day-to-day operations according to their duties and responsibilities.
- Preparation and implementation of initial Environmental Examination, Environmental Impact Assessment & Environmental Management Plans.

4. Environmental Manager | Forest Department KPK, Pakistan | March 2014 - Jan 2016

- Developed and executed plans for the Billion Tree Plantation project, ensuring compliance with environmental regulations.
- Implemented biodiversity conservation measures, considering native flora and fauna.
- Engaged local communities to promote participation in tree planting activities.
- Monitored and evaluated project progress, conducting site visits for compliance checks.
- Managed resources, including budget allocations, and coordinated with stakeholders for effective implementation.
- Prepared comprehensive reports on project status, environmental impact, and key performance indicators.
- Fostered collaborations with government agencies, NGOs, and interdisciplinary teams to enhance project impact.

5. Environmental Engineer | Sadia Minerals & Grinding Unit, Pakistan | June 2012 -Feb 2014

- Environmentally conducted comprehensive environmental assessments to ensure compliance with local and international regulations.
- Implemented and managed environmental monitoring programs, analyzing data to identify potential environmental risks and recommending mitigation strategies.
- Collaborated with cross-functional teams to integrate environmental considerations into the mineral processing operations, ensuring sustainable and eco-friendly practices.
- Developed and executed environmental management plans to minimize the company's ecological footprint and promote environmental stewardship.

- Provided expertise in wastewater management, including the design and implementation of treatment systems to meet stringent environmental standards.

Led initiatives to optimize resource utilization and reduce waste generation, contributing to cost savings and sustainability goals.

- Ensured proper handling, storage, and disposal of hazardous materials in accordance with safety and environmental regulations.
- Conducted regular training sessions for staff on environmental awareness and compliance, fostering a culture of environmental responsibility within the organization.
- Prepared and submitted environmental reports to regulatory bodies, documenting the company's commitment to environmental responsibility.
- Participated in continuous improvement projects to enhance environmental performance and minimize the environmental impact of mineral processing activities.

6. Monitoring Officer | World Health Organization (WHO), KPK, Pakistan | August 2011 - May 2012

- Spearheaded the monitoring and evaluation activities for the Polio Eradication project, ensuring the timely and effective implementation of strategies in alignment with WHO guidelines.
- Conducted regular field visits to assess the progress and performance of polio vaccination campaigns, meticulously analyzing data to identify trends, challenges, and areas for improvement.
- Collaborated with a multidisciplinary team to develop and implement monitoring frameworks, tools, and indicators, enhancing the accuracy and efficiency of data collection and reporting.
- Played a pivotal role in liaising with local health authorities, community leaders, and other stakeholders, fostering strong partnerships and garnering support for polio eradication initiatives.
- Compiled comprehensive reports on monitoring findings, presenting insights and recommendations to senior management for informed decision-making and strategic planning.
- Provided training and capacity-building sessions to field staff, equipping them with the necessary skills and knowledge to ensure high-quality monitoring and data collection.
- Actively participated in the development and refinement of project strategies, contributing valuable insights based on monitoring outcomes to optimize program effectiveness.
- Implemented corrective measures in response to identified issues, collaborating with relevant stakeholders to address challenges and improve the overall impact of polio eradication efforts.
- Stay abreast of global health trends and best practices, integrating new knowledge into monitoring strategies to enhance the project's adaptability and responsiveness.

Education

Master of Science (MS) in Environmental Sciences

COMSATS University of Information & Technology Islamabad (Abbottabad Campus), Pakistan

Bachelor of Environmental Science

COMSATS University of Information & Technology Islamabad (Abbottabad Campus), Pakistan

Licenses & certifications

- **ISO 14001: 2015 Lead Auditor (Environmental Management Systems)**

IRCA | International Register of Certificated Auditor

Research Paper Publications in International Journals

Environmental pollution and Toxicology, Environmental Chemistry

- Investigation on Melia azedarach biomass for arsenic remediation from contaminated water, **Desalination and water treatment**, volume 53,2015
- Iron oxide (Fe₃O₄)-Supported SiO₂ Magnetic Nano composites for Efficient Adsorption of Fluoride from Drinking water: Synthesis, Characterization, and Adsorption Isotherm Analysis, **Water**, 13(11),2021
- Surface-Functionalized Magnetic Silica-Malachite Tricomposite (Fe–M–Si tricomposite): A Promising Adsorbent for the Removal of Cypermethrin- **ACS OMEGA**
- Optimizing the fluoride removal from drinking water through adsorption with mesoporous magnetic calcite nanocomposites- **RESULTS IN ENGINEERING**

Personal Skills

- **Analytical Acumen:** Possess strong analytical skills to interpret complex environmental data, identify trends, and make data-driven decisions.
- **Detail-Oriented:** Known for meticulous attention to detail when tracking and recording environmental metrics and conducting assessments.
- **Adaptability:** Highly adaptable to changing environmental conditions and regulations, ready to adjust strategies and practices accordingly.
- **Strong Interpersonal Skills:** Effective communicator and collaborator, fostering positive working relationships with project teams, regulatory agencies, and stakeholders.
- **Environmental Data Management:** Proficient in managing and analyzing environmental data, ensuring accuracy and reliability in reporting.
- **Safety Awareness:** Committed to environmental safety, with a strong focus on ensuring the well-being of personnel and the preservation of ecosystems.
- **Problem Identification:** Skilled at identifying and diagnosing environmental issues promptly, facilitating rapid response and resolution.
- **Critical Thinking:** Capable of critical thinking to assess and evaluate the impact of project activities on the environment and devise strategies for minimizing effects.

Professional Development and Training

- Advanced Environmental Monitoring Techniques
- Environmental Safety Protocols
- Environmental Emergency Response
- Hazard Recognition and Management
- Hazardous Material Management Expertise
- Equipment Safeguarding Techniques
- Environmental Auditing Excellence
- Health and Safety Management

Software Proficiency

- **Environmental Data Analysis:** Proficient in software tools for data analysis and interpretation.
- **Microsoft Office Suite:** Mastery in Word and Excel for reporting and document creation.
- **Geographic Information Systems (GIS):** Competent in spatial data visualization and mapping.
- **Environmental Modeling Tools:** Capable of environmental scenario modeling.
- **Data Visualization Tools:** Proficient in creating visuals for data communication.
- **Coral Draw X6:** Graphic design proficiency for presentations.
- **Database Management:** Skilled in data organization and management.
- **Web Research:** Adept at gathering environmental information online.

Languages

Fluent in English and other local native languages.
