SUMMARY

A highly skilled and dedicated QHSE Manager with more than 15 Years of experience in the Oil and Gas industry, with a proven track record in ensuring quality, health, safety, and environmental compliance within organizations. With in-depth knowledge of QHSE standards, regulations, and best practices, I am committed to fostering a culture of excellence and sustainability. With expertise in risk assessment, incident investigation, and compliance management, I effectively identify and mitigate potential hazards, prevent incidents, and drive continuous improvement. Skilled in developing and delivering comprehensive training programs, I promote awareness and empower employees to prioritize QHSE in their daily activities. Exceptional leadership and team management abilities enable me to foster a collaborative work environment and inspire high-performance teams. With excellent communication skills, I engage stakeholders, build strong relationships, and effectively convey QHSE policies and procedures. Committed to achieving organizational goals while upholding the highest standards of quality, safety, and environmental responsibility, I am a reliable and results-driven QHSE Manager ready to make a significant impact on organizational success.

EXPERIENCE

QHSE Manager

Nabors Drilling Solutions

March 2020 - Present, Saudi Arabia

- Partner with respective Operations VPs and Area Managers to support the business with all QHSE matters to strengthen the organization's culture of safety.
- Harmonize and strengthen team efforts by establishing clear expectations, maintaining regular communication, monitoring performance, providing coaching, mentoring, and guidance, collectively overcoming challenges, and recognizing achievements.
- Assist with planning and developing relevant QHSE goals, objectives, and geo-market roadmaps.
- Develop the HSE bridging documents as required by Customers.
- Develop high-quality documents, including quality manuals, in accordance with international standards (ISO, API).
- Review bids and tenders for QHSE requirements or exceptions, and provide input when requested, with a specialization in tubular running services (TRS).
- Support with the establishment of specifications, evaluation, recommendation, and procurement for products and services related to QHSE through active participation in the Equipment Standards Committee.
- Oversee the implementation of QHSE systems and troubleshoot issues at the area/rig level. Report to senior management concerning QHSE performance achieved by their geo-market.
- Facilitate QHSE support for start-up operations, from project survey and service Quality Plan phase to rig-up execution.
- Engage with cross-functional teams and consult external subject matter experts on QHSE issues and concerns as required.
- Actively track findings/actions from audits and inspections and verify and validate closure status.
- Prepare ESG monthly reports along with carbon footprint monitoring.
- Develop modules for decision-making based on data analysis and visualization using Power BI.
- Developed and executed a comprehensive QHSE management system across all company projects.
- Develop an automation process of Tubular Running Services, starting from equipment preparation to finalizing the job and equipment return, including all inspection and maintenance stages.
- Establishes key performance indicators (KPIs) and metrics to measure the effectiveness of QHSE programs.
- Collect and analyze data to identify trends, patterns, and areas for improvement, prepare reports and presentations to communicate findings to management.
- Managing fleet, including drivers' Health and safety.
- Leads investigations for Near misses, HSE incidents, and Service Quality Incidents to determine the root causes and contributing factors. Prepare incident reports, document findings, and recommend corrective actions to prevent similar occurrences in the future.
