

# CHETLAPALLI KRISHNA SHREYANTH

**Resides:** New Brunswick, New Jersey, USA | **Contact:** +1 732 213 9200

**Email:** shreyanth7@gmail.com | **LinkedIn:** <https://www.linkedin.com/in/chetlapallikrishnashreyanth/>

## PROFILE SUMMARY

Supply Chain professional graduated in M.S. Supply Chain Analytics at Rutgers University, USA, with hands-on experience in procurement, logistics, and data analytics. Skilled in leveraging Python, MATLAB, and SAP S/4HANA to optimize supply chain efficiency, automate processes. Experienced in procurement operations with strong problem-solving abilities and adaptability in fast-paced environments. Certified in Supply Chain Logistics, Data Science, and SAP S/4HANA, bringing a strategic and analytical approach to enhancing operational performance.

## SKILL SET

Supply Chain Optimization - Logistics Management - Procurement Operations - Demand Forecasting - Data-Driven Decision Making - Operations Management - Business Process Improvement - Strategic Sourcing - Performance Analytics & Reporting - Programming - Data Analysis & Visualization – Data Modelling & Simulation Python – MATLAB - ERP & Supply Chain Management Tools - SAP S4/HANA (Enterprise Resource Planning, Procurement, Logistics)

## WORK EXPERIENCE

### 06/2025 – Present | Supply Chain Intern | Aurobindo Pharma, USA

- Supporting cross-functional teams in aligning supply chain operations with compliance and quality standards.
- Conducting data analysis to support logistics optimization and inventory control.

### 06/2024 – 08/2024 | Procurement & HR Intern | Ceres Environmental India Pvt. Ltd., India

- **Procurement Optimization:** Assisted in purchase order management, supplier coordination, and cost analysis to improve procurement efficiency.
- **HR Support & Compliance:** Assisted in employee onboarding, maintained HR documentation, and ensured compliance with company policies.

## EDUCATION

**2024 - May 2025** | Master of Science in Supply Chain Analytics from Rutgers University, USA  
Bachelor of Engineering in Electronics & Communication from BMS College of Engineering, India

## ACADEMIC PROJECTS

### Project #1: Organizational Structure Modeling – Colgate-Palmolive

- Collaborated on developing a scalable org structure model for Colgate-Palmolive, analyzing 1,199 roles across 20 sites. Built a Python pipeline for data cleansing and Lucidchart visualization, and used Seaborn for maturity benchmarking. Supported AI-driven role classification for Colgate's Digital Twin and delivered insights for workforce optimization.

### Project #2: Two-Digit Object Counter System

- Engineered a two-digit object counting system using an IR sensor, 555-timer, and a seven-segment display.
- Enabled real-time object detection and precise counting for automation and monitoring applications.

### **Project #3: LED-Based Number Guessing Game**

- Developed a three-digit number-guessing game with LED indicators that provided digit matching and position feedback, improving user engagement and enhancing logical problem-solving.

## **CERTIFICATIONS**

- Supply Chain - Logistics
- Data Science Math Skills
- SAP S4/HANA Essential Training
- Understanding and Visualizing Data with Python

## **PAPER PRESENTATION**

### **Paper #1: Comparative Analysis of SAW Substrate Materials for Unit Resonators**

**Venue:** International Conference on Micro, Nano, and Smart Systems, IISc, Bengaluru, India | **Date:** 9th July 2024

- Comparative Study: Analyzed Surface Acoustic Wave (SAW) substrate materials, including Quartz, Lithium Niobate, and other key materials.
- Property Evaluation: Assessed elasticity, piezoelectric characteristics, and density to understand material performance.
- Application Suitability: Identified optimal materials for high-performance resonators in advanced applications.

### **Paper #2: Viability Analysis of Liquid Metals for Planar Antenna Design in mm-Wave 5G Applications**

**Venue:** 2nd International Conference on Networking Embedded and Wireless Systems, BMSCE, Bengaluru | **Date:** 23-08-2024

- Exploration of Liquid Metal Antennas: Investigated the potential of liquid metal-based antennas for mm-Wave 5G applications.
- Comparative Review: Analysed both metallic and non-metallic liquid antennas, assessing their advantages and limitations.
- Technical Challenges & Developments: Highlighted recent advancements and key challenges in integrating liquid metal antennas into 5G systems.

## **PUBLICATIONS**

### **Publication #1: Sustainable Supply Chains: Measuring the Impact of Carbon Footprint Analytics** (Under Review)

- Technology-Driven Analytics – Investigated the use of AI and blockchain in tracking and reducing carbon footprints.
- Strategic Collaboration – Examined supplier partnerships and circular economy practices for sustainable supply chains.
- Emission Reduction Impact – Evaluated how carbon footprint analytics contribute to lowering greenhouse gas emissions.

### **Publication #2: The Role of Artificial Intelligence in Enhancing Supply Chain Transparency** (Under Review)

- AI-Driven Insights – Explored machine learning and blockchain for demand forecasting and anomaly detection.
- Optimized Supplier Networks – Examined AI's role in improving supplier collaboration and operational efficiency.
- Real-World Applications – Supported findings with statistical insights and industry case studies.
