

Passionate Data Scientist skilled in Python, SQL, and data visualization (Tableau, Matplotlib, Seaborn). Experienced in optimizing machine learning models and analyzing datasets for actionable insights. Committed to collaborative problem-solving and continuous learning, aiming to leverage data analytics to enhance revenue and find valuable insights. Certified in HubSpot RevOps and Reporting.

Technical Skills

- **Languages & Libraries:** SQL, Python (Pandas, NumPy, TensorFlow, Scikit-learn), R
- **AI:** Open AI API, Claude & Chat GPT as an AI assistance to improve efficiency
- **Visualization:** Tableau, Matplotlib, Seaborn, Plotly, Advanced Excel(PivotTables, Power Query)
- **Analytics & ML:** EDA, Predictive Modeling, Model Validation, Statistical Analysis (Chi-Squared, ANOVA, T-tests), Data Cleaning & Automation, PyTorch (familiarity)

Professional Experience

TRACTION COMPLETE | Northeastern University | Vancouver, BC | October 2024 – November 2024

- Enhanced data **accuracy by ~70%** through Python and Large Language Models (LLMs), streamlining standardization processes
- Collaborated **cross-functionality**, aligning **data insights** with business objectives and improving BI reporting

Leadership Experience

GRADUATE CAMPUS LIFE AMBASSADOR | Northeastern University | Vancouver, BC | May 2024 – Dec 24

- Managed **stakeholder engagement** and data-driven initiatives, increasing event participation by **~60%**
- Coordinated teams and **resources efficiently** under tight deadlines, ensuring successful event execution

Projects

DATA MINING FOR BREAST CANCER DETECTION –Machine Learning April 2024

- Developed predictive models (Logistic Regression, SVM, Random Forest) achieving ~96% accuracy
- Conducted through EDA, feature selection, and model validation to support clinical decision-making

CREDIT RISK ANALYSIS – Statistical Engineering Course Project August 2024

- Performed statistical testing (Chi-squared, T-test, ANOVA) identifying critical factors affecting loan defaults
- Provided actionable insights to optimize risk management strategies through rigorous statistical modeling

Education

MASTER OF SCIENCE– Data Analytics Engineering | Northeastern University– Vancouver, BC December'24

- Recognized as a “**Superstar Husky**” by the Dean for impactful leadership
- **Relevant coursework:** Data Analysis, Statistical Engineering, Economic Decision Management, Data Mining, Data Management for Analytics, Market Research

Trainings - SafeTALK & Graduate Leadership Institute [\[GLI\]](#)
