Dear Hiring Manager,

I am writing to apply for the position of Electrical Operation and Maintenance Engineer. With a strong educational background in Electrical Engineering and 13 years of hands-on experience in the operation, maintenance, and troubleshooting of electrical systems, I am confident that I can make a significant contribution to your team and help maintain the seamless operation of your electrical infrastructure.

In my previous role at Al-Watania Poultry Company, I was responsible for overseeing the operation and maintenance of a wide range of electrical systems, including power distribution systems, motor control centers, transformers, circuit breakers, and backup power systems. I performed routine inspections, diagnostics, preventive maintenance, and repairs, ensuring that all systems operated efficiently and complied with industry safety standards.

My experience includes:

- **Operation & Monitoring of Electrical Systems:** Managing daily operations of electrical systems and ensuring their optimal performance.
- **Preventive & Corrective Maintenance:** Developing and executing maintenance schedules for equipment, troubleshooting faults, and minimizing downtime.
- **Fault Diagnosis & Troubleshooting:** Quickly identifying issues in electrical circuits, power systems, and machinery and taking corrective action to resolve them.
- **Compliance & Safety Standards:** Ensuring all work is completed following safety guidelines and electrical regulations.
- **Project Management & Coordination:** Overseeing maintenance projects, coordinating with team members, and liaising with vendors and contractors for equipment upgrades and installations.

I am particularly interested in joining because of your focus on innovation, operational excellence, and commitment to safety in engineering practices. I believe my technical expertise and proactive approach to electrical system operations and maintenance would be a valuable addition to your team. I am dedicated to enhancing system reliability, reducing downtime, and improving overall operational efficiency.

I would welcome the opportunity to further discuss how my skills and experience align with the needs of your team. Please find my resume attached for your review, and I look forward to the possibility of contributing to your organization's success. I am available for an interview at your earliest convenience and can be reached at above mentioned mobile no and email address.

Thank you for considering my application. I look forward to the opportunity to speak with you.

Sincerely,
M. Arslan Tariq

Muhammad Arslan Tariq

Electrical Engineer

Driving License: KSA Valid Till 2029

PROFESSIONAL SUMMARY:

Accomplished Industrial & Power Plant Electrical Maintenance Engineer with over 13 years of hands-on experience in electrical operation & maintenance, system optimization, and troubleshooting across power plants and industrial environments. Expertise in managing high-voltage equipment, performing preventive and corrective maintenance, and overseeing electrical projects from inception to completion. Demonstrated ability to ensure plant operations run smoothly, minimize downtime, and ensure compliance with safety and regulatory standards. Strong leadership skills with a proven track record of managing teams and enhancing the reliability of electrical systems in industrial and power generation settings.

PROFESSIONAL EXPERIENCE:

1- Electrical Site Engineer

Action International LLC – Neom, Tabuk KSA

September 26, 2023 – Present

- Supervision of Multiple remote monitoring systems, Installation and configuration of IOT and Telemetry devices.
- Erection, commissioning, Operation & maintenance of up to 400 KVA Generators with ATS and electrical panels.
- Assist in designing, commissioning, and optimizing control systems, including **sensors, relays, timers, and potentiometers**.
- Install, configure, and maintain **Temperature and Pressure Transmitters, Limit Switches, thermocouples, Solenoids, Pneumatic valves, Flow meters, Level Switches, Pressure Switches**, and other measurement instruments.
- Develop and interpret electrical drawings and schematics to troubleshoot faults and carry out installations.
- Responsible for all electrical inspections related to installations, testing commissioning, etc.
- To attend all electrical inspections with client/contractor representatives.
- Work on **VFDs, VSD, ATS, Soft Starter, Servo motors, Contactors, Overhead Crane, Separators, heaters & Air Compressor** to maintain smooth operations of industrial machinery & equipment.
- Conduct routine and preventive maintenance on electrical systems including **gearboxes, motors, transformers, and circuit breakers** to ensure optimal performance.
- Program, troubleshoot, and maintain **PLC systems (Allen Bradley, Siemens, Omron)**, ensuring all control systems operate as designed.
- Designed and executed electrical wiring for new system installations and upgrades, including using **sensors, controllers, and relays**.
- Conducted routine inspections of electrical systems and machinery to prevent unexpected failures.

2- Electrical In-Charge

Al-Watania Poultry Company – Al-Qasim Saudi Arabia

September 20, 2020 – September 26, 2023

Preventive Maintenance:

- Develop and implement schedules for routine maintenance of electrical systems and equipment.
- Conduct inspections and diagnostics to prevent faults or breakdowns.

Troubleshooting and Repairs:

- Diagnose electrical faults, using tools such as oscilloscopes, multimeters, and other diagnostic equipment.
- Perform repairs or replacements of faulty electrical components, such as circuit breakers, transformers, and power panels.

System Upgrades:

- Design and recommend upgrades or modifications to improve the reliability or performance of electrical systems.
- Integrate new technology or automation systems to optimize plant operations.

Compliance and Safety:

- Ensure that electrical equipment and practices comply with local and international safety standards and regulations (e.g., NEC, IEC).
- Maintain safety protocols to prevent electrical accidents or hazards.

Technical Support:

- Provide technical assistance to operations staff, helping to resolve issues with electrical equipment.
- Support other engineers in projects related to system design or power generation improvements.

Documentation and Reporting:

- Maintain detailed records of maintenance activities, including work performed, parts used, and downtime.
- Prepare reports for management on the status of electrical systems, maintenance schedules, and any potential risks.

Coordination:

- Collaborate with other engineering teams (mechanical, civil, etc.) for integrated maintenance or plant shutdowns.
- Assist in planning routine or emergency shutdowns, ensuring that all systems are properly inspected and maintained.

3- Electrical Sr. Supervisor

Al-Watania Poultry Company – Al-Qasim Saudi Arabia

June 24, 2015 – September 19, 2020

- Supervise a team of electrical technicians and engineers in the maintenance and repair of all electrical equipment within the power plant, ensuring the continuity of operations.
- Lead preventive and corrective maintenance programs for electrical systems, including **generators (3.0 MW to 8.7MW), transformers (50 KVA to 5000KVA), switchgear, control panels, and battery systems**, reducing downtime.
- Oversee troubleshooting of electrical faults and implement repairs on complex systems, including **high-voltage transmission lines (13.8/33KV), motor control centers (MCC), and power distribution systems (PCC)**.
- Conduct routine **inspections**, ensuring compliance with internal and regulatory safety standards (IEC, NEC).
- Prepare detailed reports on system performance, maintenance schedules, and any safety concerns for senior management.
- Calibration of 3way operating valves, **pressure switches, level switches temperature sensors, Temperature Controller**, etc.
- Manage plant shutdowns and inspections, ensuring efficient and safe operations during critical periods.
- Mentor and train junior staff on electrical systems, troubleshooting techniques, and safety procedures.

4- Electrical Foreman

Star Textile Pvt Limited – Faisalabad Pak

January 2, 2013 – September 14, 2014

- Plan and assign daily work activities for the electrical team, ensuring that safety standards and quality are upheld while meeting project deadlines.
- Oversee the **installation and commissioning** of new electrical systems and equipment, including **generators (600KVA to 2.0KVA), transformers, and switchgear**.
- Monitor and evaluate the performance of electrical equipment, including conducting regular inspections and preventive maintenance tasks to avoid unscheduled downtime.
- Manage plant shutdowns and routine maintenance schedules, coordinating with other departments for efficient operation during downtimes.
- Provide hands-on troubleshooting and problem-solving for electrical faults and issues, including the use of tools such as **multimeters, and insulation testers**.

5- Senior Electrical Technician

AA Spinning Mill Pvt Limited – Faisalabad Pak

October 12, 2011 – January 2, 2013

- Provided troubleshooting and repair services for electrical systems, including high-voltage equipment.
- Assisted in the installation, maintenance, and testing of power generation equipment.
- Ensured electrical systems were operating at peak efficiency, contributing to enhanced plant performance.

EDUCATION:

Bachelor of Technology in Electrical Engineering

Superior College, Lahore, Pakistan

October 1, 2014 – October 18, 2016

Bachelor of Technology in Electrical Engineering

Preston University, Kohat, Pakistan

September 1, 2011 – September 1, 2013

Diploma in Electronics

Punjab Board of Technical Education, Lahore, Pakistan

September 1, 2008 – September 1, 2011

KEY SKILLS:

- Electrical System Maintenance (High Voltage, Low Voltage, Switchgear, Transformers, Motors & VFD)
- Operations, maintenance, Troubleshooting, Problem Solving, Fault Diagnosis & Repair
- Testing, Commissioning, Installation, Calibration, Documentation & Reporting
- Preventive, Corrective Maintenance & Plant shutdown management
- Electrical Control Systems (PLC, SCADA)
- Project Management & Supervision
- Energy Efficiency, Cost Reduction, Material Inspection & Inventory (SAP System)
- Electrical Safety, Compliance (NEC, IEC) & Risk Assessment
- Team network, Leadership,
- Electrical Drawings, Schematics Interpretation & Power distribution network,
- MS Office (Excel, Word & PowerPoint)
- Language (English, Arabic & Urdu)

CERTIFICATIONS & LICENSE:

- Membership of the Saudi Engineering Council.
 - Certificate of Programming logic control
 - Valid Saudi Driving License
-
