

ALABI ADAM SABITU (QA/QC Lead)**Applying for QA/QC Lead.**P. Email: adamsony2000@gmail.com

Mobile:

Residency: Valid QID & D. License.

17 Years working Extensive Experience in Civil, Oil and Gas, Infrastructure, Power

TOP EDUCATION / QUALIFICATIONS	Post Graduate Degree in Construction Project Management- St Clair. Windsor Ontario, Canada Higher National Diploma in Civil Engineering- The Federal Polytechnic Ado Ekiti, Nigeria. National Diploma in Civil Engineering. - The Federal Polytechnic Ado Ekiti, Nigeria.
---------------------------------------	--

CAREER OJECTIVE

- Competent in supervising engineering functions and construction detailing leading to the execution of works as per design, requirement, contract, and specifications, and conforming to Safety, Quality, and cost in Infrastructure, Oil and Gas, Building and Commercial Projects.
- Expert in reviewing project technical documents and preparing technical reports for construction functioning according to prefixed organizational parameters.
- Verifiable track record for the successful completion of projects.
- Objective is to lead the growth of an organization operating in the construction field
- Project management orientation and standard.
- Documented track record of success in spearheading challenging and complex projects and executing them to the handover stage, despite hurdles.
- Prompt decision-maker with the capability to wade through crisis situations with great objectivity.
- Extensive industrial production line experience.
- Understanding of Standards like QCS, ACI, ISO 9001, ASTM, BS, CSA, CIRIA, etc.

PROFESSIONAL QUALIFICATIONS / TRAINING

- ISO 9001:2015 Lead Auditor
- CSWIP 3.1 Certified
- Occupation Health & Safety Certification (OHSA CERTIFIED USA)
- ISO 9001:2008 QMS, ISO 14001 EMS
- Work at Height, Confined space

PROFESSIONAL EXPERIENCE:**EMPLOYMENT HISTORY -CANADA****Sterling ridge Group Windsor Ontario Canada.****Joining Date:** March 2023-Till Date**Designation:** QA/QC Manager**Project Title:** Construction of Hydro Substation-**Client-** Hydro One Canada**Responsibilities:**

- Perform regular internal audit, checking contractor agreements and certifications, preparing audit checklists based on ISO standard and give list of findings to the auditees for corrective/Preventive action and opportunity for improvement.
- Monitoring KPI and tracking how long NCR remains open and why it is remaining open,

the total number of quality-related non-conformance reports raised. Indicates compliance with quality standards (ISO, client specs, etc.).

- Develops project quality plan, and annual review of quality management system as per ISO 9001:2015.
- Monitoring all third-party test reports and making sure they are all as per specification, codes, standard and contracts documents.
- Prepare monthly project quality reports(PQR), provide and arrange monthly quality training to discuss all quality related issues with project engineers and Project manager.
- Develops and Implement Inspection test plan and define hold points.
- Construction of an onshore nitrogen production facility

**SBM OFFSHORE
NOVA SCOTIA, CANADA.**

Joining Date: March 2021 – Feb.2023

Designation: Project QA/QC Coordinator

Project: Construction of Brownfield Site Nova East Floating Wind Farm Project (Offshore FOW) JV SBM Offshore & DP Energy (SIMOPS Oil & Gas)

Responsibilities:

- Plan, coordinate and perform inspections of welding, fit-up, bolt tensioning, cable pulling at key hold points as per inspection test plan.
- Manage all related NCRs Non-Conformance Reports and facilitate corrective/preventive actions (CAPA)
- Develop and implement the QA/QC plan for the construction phase of the floating offshore wind project.
- Ensure compliance with applicable codes, standards (e.g., ISO 9001, DNV, IEC, API), and project specifications.
- Coordinate all related QA/QC activities among subcontractors, vendors, and internal teams across offshore scopes.
- Coordinate inspections, NDT (non-destructive testing), and remedial work as needed and submitting all related reports to client representatives
- Coordinate and perform internal audit making sure all subcontractors are aligned with project quality plan and specifications.

Pomerleau INC Calgary Canada

Joining Date: Nov. 2017-Mar. 2021

Designation: Project QA/QC Lead

Project Title: Construction of Carbon Capture, Utilization, and Storage facilities (CCUS)- Client Alberta Energy Regulator

Responsibilities:

- Review and Monitoring all Engineering fill such as SSM, Clay, Granular materials gradation and proctor test reports used in reclaiming brownfield site.
- Monitoring of Non - conformance/Observations and keeping them up to date on Procore software.
- Responsible for opening and maintaining all work-related ITPs and submitting them to the client for review.
- Responsible for all quality-related issues on site, monitoring all test-related activities, and uploading them on Procore as required.
- Coordination with the project Engineer, by making sure all the open NCR/OBS are closed as soon as possible within a given timeline.
- Coordinating weekly NCR updates with the client representatives
- Preparing notification requests for the third-party tester on site to test pipe welding, leakage test and submitting all the test reports to the client through documents controller
- Providing adequate lessons learned to the construction team from all Non-Conformance and observations.
- Preparing Deficiency/punch list and making sure all the lists are catered for withing given timeline.
- Participating in both internal and external quality audit to ensure compliance on everyday safety cards implementation in requirements to the daily activities.

Shapoorji Pallonji Qatar

Joining Date: Sep. 2013-Aug 2017

Project: South East Car park Project,

Qatar Foundation: Construction of South East underground Car park including basement, PMS, Service Station for metro project Qatar foundation

Designation: **SR.QA/QC ENGINEER**

Responsibilities

- Review materials received on site in line with project requirements, obtain signature from Deputy Manager QA/QC and submit to the Consultant / client for approval through document controller.
- Review Material inspection requests for correctness prior to submission.
- Review of Method Statement, Work Instructions, Inspection and Test Plans, and Check-Sheets Jointly with Construction Manager.
- Implementation of the Project Quality Plan and Quality Control Procedure for the project.
- Provide quality induction to new coming staff, subcontractors and workers.
- Preparation of project related procedures required for various processes.
- Monitor material testing frequency and coordinate with testing agency for testing of materials and maintain records accordingly.
- Routine site inspections and offsite inspections as required.
- Attend internal audits/surveillance audits in coordination with Deputy Manager QA/QC follow-up on closure of observations and maintain records accordingly.
- Prepare status of Audit observations/Site observation/NCR on weekly basis and follow up for closure.
- Analysis of NCR for determination of root cause. Report to the Deputy Manager QA/QC any deficiencies in the operation of Quality Management & Control System on site
- Conduct training/Toolbox talks on approved method statement / work instructions / ITP / Check list for all activities prior to commencement of work at site and prepare training reports.
- Preparation of Weekly QC Report, Review of Daily QC Reports, and updated NCR status reports
- Perform other tasks as assigned by the Dy. Manager QA/QC.

Hyundai Engineering E&C, QATAR
JOINING DATE : Dec.2010 – AUG.2023
Designation: QA/QC ENGINEER(CIVIL

Project LUSAIL P003 PROJECT,QATAR Production and Erection of I-Girder Beam for South and North Coastal

Bridge PC Panel (U-Beam) for Interchange and Onaiza Tunnel

Responsibilities:

- Plan and coordinate job tasks by creating detailed documentation of work performed on

Physical facilities

- Responsible for all precast concrete members / mock-up activities at the precast yard
- Prepare non-conformance reports for QA/QC manager to review and assist in developing corrective actions and root cause analysis.
- Responsible for all quality related issues on concreting, starting at receiving from batching plant, passing compressive test and documentation and filing of logs.
- Compliance with the site's health and safety regulations during inspection on site

Liaise with the consultant on quality related matter from materials to work inspection on site

- Co-ordination of all temporary work, implementation of safe system of works
- Render monitoring and surveillance on site to control the quality of work being implemented by the construction group.
- Preparation of the Request for Concrete order, Request for Inspection of Given Material, Rebar works and Formworks.
- Coordination & direct supervision of all activities related to laboratories & field tests
 - Review of inspection test packages during construction activities

Responsible for quality assurance & quality control at the project site and report to the QA/QC Manager

- Assist the QA/QC Manager in preparation of all related quality documents such as ITPs & Method Statements
- Responsible for Monitoring and Supervision of Concrete delivered on site to check for the slump, temperature and Segregation of Concrete delivered on site.
- Monitoring of Construction material delivered on site to check for the quality of the material, Stacking and check for the tensile and compressive strength of the given material such as Rebar, Pre-stressed strand etc.
- Responsible for Monitoring of Cube Test Carried out in the concrete laboratory to ascertain the compressive strength
- Full supervision of reinforcement placing prior to concreting activity, internal inspection for all activities on the site.
- Carryout all inspections with main contractor & Consultant and get approval

PERSONAL DATA

Gender: Male
 Religion: Islam
 Marital Status: Married
 Date of Birth: May 7th, 1983
 Nationality: Canadian
 Residency: Qatar
 QID Validity: 24-03-2027
 Qatar Driving License: 17-03-2028
