Sex Male | Date of birth 04/02/1999 | Nationality Pakistani

ABOUT ME

A motivated and detail-oriented Chemical Engineering graduate seeking an entry-level position in a dynamic industrial environment, where I can apply my academic knowledge, technical skills, and passion for process optimization to contribute to operational efficiency, safety, and innovation while gaining practical experience and professional growth

WORK EXPERIENCE

JUNE 2025 - Current

HSE Officer

Company : Al Sharif Group Client : SEC (Saudi electric company) Project: Construction of Al Rimal Substation 132/13.8 KV Location: Al-Rimal, Riyadh

- Established a compliant Occupational Health & Safety Management System tailored to site operations
- Ensured ongoing tool safety and readiness
- Secured proper permits before all high-risk activities.
- Embedded critical safety rules (SEC life saving rules) in daily operations.
- Ensured compliance with SEC standards for all excavation and elevated work.
- Delivered structured safety governance and continuous improvement
- Conducted thorough Risk Assessments and Job Safety Analyses across all tasks.
- Led health & safety training programs, drills, internal audits, and inspections..
- Tracked HSE policy effectiveness and closed identified safety gaps
- Lowered incident frequency via focused training, oversight, and toolbox engagement.

OCT 2022 – JUNE 2025

Drilling Engineer

China National Petroleum Corporation-Chuanqing Drilling Engineering Company Pak Branch, Client: OGDCL & PPL.

- Worked on development, Vertical, Horizontal & Exploratory wells.
- Preparing daily drilling reports (DDR), monthly invoices and maintaining records.
- Arranging & Measuring bottom hole tools prior to run in string and creating draft diagram along with calculations in excel sheet.
- Operating hydraulic testing unit to conduct BOP pressure test and analyze effectiveness of equipment.
- Well head installation and pressure testing and sound knowledge of well head sizing and pressure ratings.
- Making BHA & casing tallies along with operational parameters (Length calculations, Mud weigh and string weight calculations).
- Record bit performance, time vs. depth data, BHA configurations, etc.
- Troubleshoot drilling problems such as stuck pipe, lost circulation, or wellbore instability.
- Calculating mud pump efficiency, volume calculations in drilling string and well bore.
- Sound knowledge of PSV valves, gate valves, ball valves, Pumps, compressors, equipments and whole circulation system of rigs.
- Observing operational parameters e.g flow rates of drilling fluids (GPM), pressure (SPP), Torque (klbf/ft), RPM, ROP (rate of penetration) and reporting abnormalities to senior engineers.

APRIL 2022 – OCT 2022

Trainee Production Engineer**OGDCL Nashpa oil and gas processing and LPG recovery plant Location: Karak district, KPK, Pakistan.**

- Observe crude oil separation, natural gas dehydration, LPG recovery, and condensate stabilization units.
- Learn to track process parameters (temperature, pressure, flow rates)
- Support field engineers in equipment checks (pumps, compressors, heat exchangers)
- Learn start-up and shutdown sequences during operations.
- Assist senior engineers in monitoring key parameters of **oil, gas, and LPG processing**.
- Collect field data for **flow rates, pressures, temperatures, and chemical dosing**.
- Accompany control room operators and field engineers to understand **DCS/PLC systems**.
- Assist in **sampling of crude, gas, and LPG** and coordinate with the lab for analysis
- Monitor chemical quality and suggest adjustments under supervision.
- Assist in preparing **Material Safety Data Sheets (MSDS)** and chemical inventory records
- Learn about handling and safe storage of **corrosion inhibitors, demulsifiers, and scavengers**
- Shadow the maintenance team to understand the role of **pumps, compressors, heat exchangers, and valves**
- Observe the operation of heat exchangers, separators, pumps, and compressors
- Prepare technical reports on assigned learning tasks

SEP 2021 – APRIL 2022

Trainee Production Engineer**Pioneer Cement Company Limited, District Khushab, Sargodha, Pakistan.**

- Understand and learn operation of rotary kiln, VRM & crushers.
- Coordinate with CCR (Central Control Room) operators and field operators.
- Observe equipment start-up, shut down, and changeover procedures.
- Monitor key process parameters (kiln, Preheater, cooler, mill) on control systems (like DCS).
- Report abnormalities or process deviations to seniors.
- Liaise with the Quality Control department to ensure raw meal, clinker, and cement quality.
- Learn basics of cement chemistry and quality parameters (like LSF, SM, AM).
- Observe preventive and corrective maintenance activities.
- Assist in shutdown preparations and equipment isolation procedures.
- Report any unusual equipment behaviour to maintenance team.
- Attend technical training sessions on process and equipment.
- Gain exposure to energy optimization, waste heat recovery, and environmental controls.
- Learn industry standards and compliance requirements (ISO 9001, 14001, 45001).
- Contribute to reducing energy consumption, minimizing waste, and improving process efficiency.

EDUCATION

2017-2021

B.Sc Chemical Engineering

University Of Engineering And Technology.

University campus Peshawar, Pakistan.

www.uetpeshawar.edu.pk

2015-2017

F.Sc Pre-Engineering

Fazaia inter college shaheen camp, Peshawar.

CERTIFICATIONS

- Nebosh, IGC3, Occupational Health and Safety.
- Hydrogen sulphide awareness (Online).
- Chemical process safety (Online in progress).
- Confined space safety (Online).
- Safety management in construction (Online).
- Health and safety – Fire safety planning and training (Online).
- Diploma in fire safety (Online).
- Work at height.
- Risk assessment.
- Accident and emergency.
- Control of work.

SKILLS

Personal skills

- Teamwork
- Project management
- Leadership
- Communication.
- Problem solving.
- Attention to detail.
- Critical thinker.
- Smart worker.
- Communication & presentation skills.

Computer skills

- CIT (Certificate in information technology).
- MS Office.
- Retrieving data from internet.
- Research and development.
- Basic Aspen HYSY & DWSIM (Chemical process simulation software).
- MS Visio.
- Basic Auto-cad.
- Adobe alight motion.
- Adobe Photoshop.
- Content writing.
- Video editing.
- Social media use for business development.
- Typing skills.

Language

Pashto (Native) Urdu (National) English (Speaking, Reading & Writing)

Driving licence

- Pakistani Driving license
