PROFESSIONAL HIGHLIGHTS

- Developed effective written and verbal communication skills through extensive professional experience. Able to communicate clearly and effectively at the appropriate level with various types of people.
- Established people skills while consulting with the employees, external organizations, and customers. Able to document key information in a succinct and professional manner while collecting customer reports and queries.
- Making sure project is accomplished as per the triple constraints (time, quality, scope)
- Planning the work breakdown structure before executing the work and use of five knowledge areas (initiation, planning, execution, monitor and control, closing) to complete the project.
- Negotiating with the stakeholders in day-to-day life while working without any disputes to continue the work.
- Critical thinking, emotional intelligence and problem solving these are the skill which I have developed through my professional career.
