SUMMARY

Enthusiastic and dedicated fresh graduate Environmental Engineering student from RMIT University with First Class Honours and a strong foundation in water and waste management, environmental impact assessment, and sustainable engineering. Proven ability to apply technical skills in real-world projects, including waste stream analysis at a Waste-to-Energy plant and field monitoring of water quality. Equipped with diverse certifications (LEED Green Associate, CAPM®, ISO 14001 Lead Auditor) and international exposure through academic programs in Japan. Committed to driving environmental sustainability through innovation, collaboration, and evidence-based practices.

EDUCATION

Bachelor of Engineering (Environmental Engineering) RMIT University, Melbourne, VIC. June 2020 - June 2025

- Relevant Coursework: Environmental Impact Assessment, Water Resource Management, Air and Water Quality Engineering, Sustainable Development, Waste Management.
- GPA: 3.7 out of 4 - (H1) Honours First Class

PROGRAMS

Engineering Summer School Kobe University, Kobe, Japan. July 2024

Participated in an intensive program focusing on engineering disciplines such as IoT, structural engineering, membrane technology and disaster resilience at Kobe University, facilitated by RMIT University.

VOLUNTEERING

Darebin Creek Management Committee. January 2025 - July 2025

Working as a Waterwatch with Friends of Darebin Parklands to assess water parameters such as pH, ammonia, DO, phosphorus, EC, and turbidity along Darebin Creek in addition to making monitoring plan and reports on a regular basis.

CERTIFICATION

- LEED Green Association. • CAPM®. • OSHA 30H. • ISO 14001:2015 Lead Auditor. • AutoCAD.

CAPSTONE PROJECT

Analysis of Recyclable Waste Streams in Kwinana WtE Plant (ACCIONA). June 2024 - June 2025

Conducted a detailed analysis of recyclable waste streams at the Kwinana Waste-to-Energy Plant in collaboration with ACCIONA. Focused on identifying material recovery opportunities, assessing waste composition, and proposing strategies to enhance recycling efficiency and support sustainable operations.

PROFICIENCIES

- **Languages:** Arabic (Native), English (Fluent).
- **Soft Skills:** Team Collaboration, Problem Solving, Intercultural communication, Adaptability, Time Management, Creativity, Ethics, Leadership, meticulous, Initiative, Critical Thinking, Interpersonal Skills, Professionalism.
- **Hard Skills:** Laboratory, AutoCAD, Environmental analysis, Waste management, Water quality, Drinking Water Guidelines, Technical Documentation, Project Management, Microsoft Office, Stormwater Management, MUSICX software, ArcGIS Products, Surfer software, Water Sensitive Urban Design, Environmental Site Assessments.
