

Asad Waqar (Architect)

Riyadh , Saudia Arabia - Transferable Iqama

Cell: +966(0) 539933962 - +92(0) 333 9304005 - Email: asadwaqar50@gmail.com

OBJECTIVE:

To become part of a renowned and professional organization where I can bring about and finish my skills further to add value to that organization.

WORK EXPERIENCE:

Architectural BIM Modeller

BL Harbert International LLC

Project: New US Consulate Construction Project, Erbil, Iraq.

Date: August 2024 – April 2025

Main duties and responsibilities:

- Skilled in preparing and reviewing shop drawings to ensure full compliance with IFC drawings, project specifications, and overall design requirements.
- Create and manage highly detailed 3D architectural models using Building Information Modeling (BIM) software (Revit and AutoCAD, Lumion) based on architectural designs, sketches, or concepts.
- Produce accurate 2D drawings, sections, elevations, and documentation from the 3D models, including floor plans, detailed wall sections, and component details.
- Adhere to BIM standards and protocols, including LOD (Level of Development) requirements, ensuring that models are compliant with project-specific BIM Execution Plans (BEP).
- Manage and extract information from models for project schedules, quantities, and reports, ensuring that data is accurate and up-to-date for use in project planning and construction.
- Work closely with architects, engineers, contractors, and other team members to develop designs and optimize models, facilitating project coordination and sharing models through Common Data Environments (CDE) like BIM 360.
- Perform regular checks and quality reviews of BIM models for accuracy, completeness, and compliance with project requirements and specifications.
- Create and modify parametric families and objects within Revit for various architectural elements such as walls, doors, windows, and custom components.
- Facilitate interdisciplinary collaboration between architecture, structural, and MEP teams by coordinating model changes and ensuring model integration.
- Maintain records of changes and updates in the BIM models throughout the project lifecycle, providing clear and traceable documentation for future use and reference.
- Attend coordination and design review meetings, providing input on model accuracy, design adjustments, and collaborating on technical issues.
- Assist in developing detailed construction documentation and generating as-built models and drawings upon project completion.
- Provide training and support to team members and stakeholders on BIM processes, best practices, and software usage as needed.
- Visiting building worksites to ensure work is being done according to architectural plans.
- Prepare and review submittals for as-built drawings, vendor shop drawings, material and recommend improvements and/or ideas to designs.

Architect

KWS Consultants, Kohat, Pakistan.

Project: Multiple projects (Residential and Commercial)

Date: May 2023 – June 2024

Main duties and responsibilities:

- Making bids on potential building projects.
- Preparing submission and detail designs drawings for client and government department approval.
- Working with clients to determine requirements for projects.
- Developing ideas, keeping in mind client's needs, building's usage, and environmental impact.
- Developing initial estimates on structure costs, building time and special requirements.
- Analyzed rough sketches and interpreted specifications to develop 2D and 3D drafts.
- Reviewed and recommend improvements and/or ideas to designs.
- Coordinates with construction team to develop new CAD drafts.
- Visited building worksites to ensure work is being done according to architectural plans.
- Prepare scaled drawings, either with computer software or by hand.

Junior Architect

AR Studio, KDA, Kohat, Pakistan.

Project: Residential and Commercial Projects.

Date: March 2020 – April 2023

Main duties and responsibilities:

- Prepare designs, complete construction documents, write up building plans, and assist in the presentation of materials.
- Prepared architectural plans and designs, assisting in essential presentations, and helping develop and finalize building plans.
- Analyzed rough sketches and interpreted specifications to develop 2D and 3D drafts.
- Reviewed and recommend improvements and/or ideas to designs.
- Coordinates with construction team to develop new CAD drafts.
- Help and support engineers to quantify material as project required.
- Visited building worksites to ensure work is being done according to architectural plans.
- Prepare scaled drawings, either with computer software or by hand.
- Collaborated with engineers and contractors to develop and present design concepts to clients.

EDUCATIONAL QUALIFICATION:

Education	Institute
BS Architecture (2015-2020)	CECOS University of Science. Engineering & Technology, Peshawar, KPK, Pakistan.
FSc. (2012 – 2014)	Oxford Science School and Collage, Karak KPK, Pakistan
Matric (1998 – 2012)	Beacon Public High School, Kohat, KPK, Pakistan.

COMPUTER SKILLS:

MS Word, MS Power Point, AutoCAD, Sketchup, Lumion, Revit (Architecture).
