

Ali Fayyaz Durrani

Senior Software Engineer

Jeddah, KSA (966) 55-748-9418 alidurrani550@gmail.com LinkedIn

Summary	Software Engineer with expertise in Python (Flask, FastAPI, Django) and AI/LLM systems, skilled in developing scalable web apps, REST/gRPC services, and background processing with Celery and Redis. Experienced in eBPF-based network monitoring, security analysis, and performance optimization, as well as cloud automation (AWS, IBM Cloud, Terraform). Proficient in RAG architecture, Agentic AI, and system reliability engineering, delivering solutions that combine backend engineering and AI-driven intelligence.				
Skills	Python	FastAPI	Django	PostgreSQL	MySQL
	Neo4j	Celery	Redis	gRPC	Docker
	Linux	Microservices	Git	eBPF	RAG Architecture
	Agentic AI	Langchain	MCP	Terraform	AWS Cloud
Experience	Wanclouds Inc Senior Software Engineer 2022-12-18 - Santa Clara, CA https://wanclouds.net - Designed and integrated Retrieval-Augmented Generation (RAG) architecture with vector databases and LLMs, significantly improving the accuracy and relevance of AI-driven knowledge retrieval. - Developed and deployed RESTful APIs and gRPC services using Flask, FastAPI, and Django, improving microservices communication efficiency by 40%. - Implemented Celery with Redis for background processing, boosting system scalability and reducing task execution time by 35%. - Optimized MySQL and PostgreSQL queries, reducing database latency by 20% and enhancing data-intensive application performance. - Automated Disaster Recovery (DRAAS) for IBM COS by integrating IBM APIs, streamlining operations and cutting manual intervention by 50%. - Utilized Terraform for infrastructure automation, accelerating AWS and IBM Cloud deployments by 2x and ensuring reliable, repeatable provisioning. - Applied eBPF for advanced network observability, improving monitoring accuracy by 30% and strengthening system security analysis.				
	Claystone Python/Django Developer 2022-05-10 - 2022-07-12 https://claystone.pk - Developed and maintained web applications using Django, improving backend efficiency by 20%. - Developed and optimized RESTful APIs, increasing data exchange speed by 40% and reducing server load by 25%. - Enhanced PostgreSQL/MySQL queries, reducing query execution time by 30%. - Built authentication and authorization systems using Django's built-in features, reducing unauthorized access incidents by 99% and enhancing system security. - Collaborated with teams to deliver high-quality software solutions in an agile environment, reducing sprint delays by 15%.				
Education	University Institute of Information Technology - PMAS Arid Agriculture University Rawalpindi 2018-10-21 - 2022-07-15 https://www.uaar.edu.pk/ BSCS				
Certifications	Penetration Testing University Institute of Information Technology - PMAS Arid Agriculture University 2019-07-21 https://www.uaar.edu.pk/uiit/	Data Science University Institute of Information Technology - PMAS Arid Agriculture University 2019-07-21 https://www.uaar.edu.pk/uiit/			

Projects	VPC+ – Multi-Cloud Migration & Disaster Recovery SaaS A SaaS platform that facilitates migration and disaster recovery across multiple cloud environments. https://vpc.wanclouds.net • Contributed to VPC+, a SaaS platform enabling multi-cloud migrations, disaster recovery, and resource orchestration across AWS and IBM Cloud. • Developed and streamlined cloud migration workflows, including infrastructure translation from AWS to IBM Cloud and automated DRAAS for IBM COS buckets and Virtual Server Instances (VSIs). • Ensured secure, cost-effective, and scalable cloud transitions by eliminating the need for complex scripting and manual configurations.	Dec 2022 - Present
	Secmon (AI & Network Security Monitoring Agent) An AI and network security monitoring agent designed to track activities and enforce policies. https://bot-stage.wanclouds.net • Developed an agent-based monitoring system using Python, C, and eBPF that communicates with a web application (Secmon Controller). • The agent tracks employee access to public LLMs or sensitive destinations, providing real-time visibility to administrators. • Built and optimized an admin dashboard to enforce Firewall and LLM access policies, enabling admins to control traffic on the host where the agent is deployed. • Ensured secure communication between the agent and web application for efficient policy enforcement and compliance monitoring.	Jun 2024 - Present
	CloudWhisper Cloud Whisperer is an AI-powered cloud assistant that simplifies cloud infrastructure management. It helps IT teams monitor, backup, restore, and migrate cloud resources efficiently, using AI-driven recommendations and a conversational interface. The platform supports multi-cloud environments and integrates with monitoring tools for proactive alerts and root-cause analysis. https://cloudwhisper-stage.wanclouds.ai • Memory Management Integration: Implemented efficient memory handling to improve system performance and stability. • Agentic AI Integration: Integrated agentic AI modules, enabling intelligent automation and decision-making across cloud resources. • MCP Integration: Integrated the Multi-Cloud Control Plane (MCP) for seamless management and orchestration across multiple cloud providers.	Jan 2025 - Present
