As a Project Controls (PC) Professional with a proven background, it is with excitement I submit my CV for your consideration. In addition to my Canadian education and training, my extensive 20-year international history of demonstrated experience makes me an excellent match for the unique demands of a **Senior Cost / Project Controls (PC)** role. Every one of the companies (only 3 over 20 years!) I've worked with have shown countless interest in retaining my services (despite various layoffs) due to the immense value they believed I brought to their teams as I continuously advanced with growing responsibilities across different PC roles.

In each of my professional roles, I have been successful in producing constructive results and I have a consistent history of advancing shared company goals to a point where our entire PC team has been highlighted by Senior Management. Please review the following examples from my resume, which outline some of the many strengths I can leverage to advance your team's success.

- On an enterprise level I have successfully set up, defined, and rolled out project control policies and procedures (from small under \$100k projects to huge over \$10 Billion).
- On individual project level, I have ensured project costs remain in line by identifying risks, opportunities, trends, and providing independent completion costs. I have over the years various examples of cost savings, with the latest being a recuperation of \$700k in mismanaged costs in 2022 and another cost recovery of \$225k in 2021.
- Corroborated across multiple disciplines (both CAPEX and OPEX) within the Owner's organization (from Development to early FEL/ FEED Engineering to Execution to CSU / handover/Closeout to OPS / Brownfield) and various external service providers to estimate, monitor, control, and forecast project costs for senior management.

My resume provides further detail on my talent for team collaboration and passion for problem solving; from my unique ability to communicate executive cost summaries to management to forensically analyse detailed cost data for front line construction supervisors.

Sincerely,

Majid Shahadat

Majid Shahadat

Career Overview

A Senior Project Control/Cost Engineering Specialist with over 20 years' experience across the full project life cycle from initial planning phase to design and engineering, project execution and final project close out. USA PMP Certified, I am academically qualified with a Canadian Bachelor of Commerce - Management Information Systems and an Applied Project Management Certificate with experience spanning Canada and Middle East. My expertise includes project control, detailed cost engineering, risk and budget management across the light and heavy oil and gas industry. My strengths lie in my ability to forensically analyze and interpret detailed cost data for senior management. An analytical problem solver, I have a thorough understanding of cost management and controls to effectively manage projects including cost accounting/classification, cost types, cost development, cost control, project cost planning, scheduling, and reporting. Possessing a strong work ethic, I am a highly adaptable team player whose work is consistently reliable and who can engage with analytical, critical, creative, innovative solutions.

Key Skills:

- **Qualifications:** Bachelor of Commerce - Management Information Systems and Applied Project Management Certificate (Canada).
- **Memberships:** Project Management Professional (PMP) and Certified Cost Engineer (CCE – in process)
- **Geographical Experience:** Canada and Middle East
- **Industry Experience:** Oil & Gas (Light and Heavy Oil), both major Owner and Engineering companies
- **Critical Skills:** Strategic Planning, Project Management, Risk Assessment, Cost and Risk Management, Cashflow Management, Trends Analysis and Process, Forecasting, Budgeting, Workflow Systems, Contract Management, Process Improvement and Project Reporting, Earned Value Management and Cost Baselines
- **Languages:** English, Arabic, Hindi and Urdu (native fluency)

Personal Details

Nationality: Canada and UK
Civil Status: Married, wife and 4 children
Date of Birth: 1976
Location: Calgary, Canada

Career Summary

Qatar Energy LNG – QATAR, Middle East		April 2025 – Present
Cost Lead NFXP – LNG	\$30 BB	April 2025 – Present
Conoco Phillips Exploration & Production – CANADA		December 2011 – April 2025
Cost Engineering, Turnaround, Pads – Oil & Gas	\$500 MM	November 2019 – April 2025
Field Senior Cost Engineering Specialist – Gas	\$900 MM	July 2018 – November 2019
Cost Engineering Lead – Oil & Gas	\$100 MM	July 2018 – November 2019
Field Risk / Cost Engineer - Oil	\$12 BB	December 2011 – June 2015
Vista Projects Engineering – Calgary, CANADA		October 2004 – December 2011
Project Cost Control Lead – Oil & Gas	\$50 MM	November 2009 – December 2011
Project Control Specialist – Oil & Gas	\$1 BB	December 2006 – October 2009
Project Services Analyst – Oil & Gas	\$1 BB	October 2004 – November 2006
Nexen Energy Inc – YEMEN, Middle East		September 1995 – September 2000
Cost Control / Pump Data Technician – Oil & Gas	OPS	September 1999 – September 2000
Production Data Administrator – Oil & Gas	OPS	September 1995 – August 1999

Employment History

Qatar Energy LNG **April 2025 - Present**

Cost Lead

www.qatarenergylng.qa/

QatarEnergy LNG, formerly Qatargas, is the world's largest Liquefied Natural Gas (LNG) company.

Cost Lead – NFXP Shared Business Services - LNG **April 2025 - Present**

Project:

- NFXP (North Phase Expansion) valued +\$30 Billion (world's largest ever single-phase LNG expansion project).

Responsibilities:

- Accountable for developing & maintaining cost control processes and ensuring cost data integrity across VOWD reporting, forecast updates, contingency and change management, expenditure and owners' allocations.
- Direct and provide expertise to Project Cost Engineers across all Contracts and support the Business Manager for Funding Packages and in maintaining a clear, transparent line of sight for Project Cost At Completion.

Conoco Phillips Exploration & Production **December 2011 – April 2025**

Senior Project Control / Cost Engineering Specialist

www.concophillips.com

Conoco Phillips is world's largest oil and gas integrated company based on production and proven reserves.

Cost Engineering – Shutdown/Turnaround/Pads & Pipelines **November 2019 – April 2025**

Project:

- Both Surmont (Oil) and Montney (Liquids/Gas) Maintenance/Capital projects from \$250k to \$300 Million.

Responsibilities:

- Managing 2 staff, responsible for full life cycle of Turnaround and Pads, from planning collaboration with Operations to full cost /risk tracking during execution to financial / contractual / supply chain close out.
- By 2022, was officially recognized for recuperating close to \$1MM in costs from contractor mismanagement.

Senior Cost Engineering Specialist – Gas **July 2018 – November 2019**

Project:

- Montney Gas Plant: Greenfield project in Fort St John BC, Canada, valued at over \$900 Million.

Responsibilities:

- Directing 2 staffed site Cost Control including cost / budget reporting and project control management services.
- Established construction cost summaries / key performance dashboards through source data from contractor's project wide and developed an independent owner-based risk and contingency management process.
- Established and then resolutely forecasted and maintained an independent Owner's Cost final forecast.
- Monitored, reviewed and analysed EPC's integrated cost reports, forecasts, schedules, and trends.
- Ensured costs remained in line via risk and trend analysis, providing independent completion costs based on productivity measurement, labour rate analysis, rates of placements and earned value management.

Cost Engineering Lead – Oil and Gas **October 2015 – June 2018**

Project:

- Surmont Phase I Brownfield Projects (BMP) in Fort McMurray, Canada valued at \$5 Million to \$100 Million.
- Facility Engineering Minor Modification Projects (MMP) in Calgary, Canada valued at \$250k to \$10 Million.

Responsibilities:

- Set up a transition plan of oil sands cost systems to gas business and establish gas operations' project controls.
- Developed Authorization for Fund Expenditure (AFE) by facilitating Budget submissions as required, integrating long range planning (LRP) and management of change (Change Orders and Change Management for Contracts and Project Funding) processes in SAP.
- Provided active functional support in the development of AFEs by facilitating supplemental budget submission processes and integrating LRP and MOC processes in SAP and by working with Estimator/s.
- Developed site project controls procedures and ensured implementation within EPC project controls' group.
- Reduced execution risk by pioneering a data collection procedure between interfaces (Capex & Opex) showcasing costs performance of plan and unplanned work.
- SPOC for holistic budget / cost control on the life cycle of BMP projects from maintenance notifications and work orders to execution to full project close out activities.

Field Risk / Cost Engineer – Oil **December 2011 – October 2015**

Project:

- Surmont II Construction, Alberta, valued at +\$10 Billion (largest single-phase SAGD undertaken in history).

Responsibilities:

- Reported to the Project Services Manager, responsible for senior cost engineering for the full \$10 Billion project.

Project Cost Control Lead

www.vistaprojects.com

Vista specialises in heavy oil (SAGD, CSS) and has engineered 1/3rd of Alberta's total SAGD production capacity.

Key Projects:

- Encana / Cenovus Heavy Oil SAGD projects: vary in value from \$10 Million to \$1 Billion.

Project Cost Lead - Small Projects**November 2009 – December 2011****Project:**

- Non-Encana/Cenovus projects: various small Greenfield construction projects valued between \$5-\$50 million.

Responsibilities:

- Reported to the Project Manager / Director and was responsible for the establishment of entire systems for cost monitoring and reporting to validate costs and ensure project milestones and customer requirements were met and to minimise any commercial risk.
- Defined project cost processes, systems and strategic processes including resource costs for monthly financial projection/s and coordination of project management cost reports.
- Developed budgets and schedules to conform to project requirements as needed.
- Developed Work/Cost Breakdown Structures and prepared tables and charts to analyse project cost data.
- Generated purchase requests and vendor documentation for projects as project coordinator.

Project Controls Specialist – Major Projects**December 2006 – October 2009****Project:**

- Encana / Cenovus Major Projects: Cenovus Christina Lake Greenfield Construction valued at \$1 Billion.

Responsibilities:

- Reported to the Project Engineering Manager, managed 2 staff and was responsible for the development of full cycle budgetary reporting and cash flow systems including the development of a 3 Year 5,000 task schedule.
- Boosted interface efficiency by 80% between different engineering companies on projects.
- Created unique forecast curves for capital cash flow management by using regression analysis on historical data, increasing forecast and accrual accuracy by 60%.
- Maintained cost reports for CAD600 Million projects including the analysis for cost factors while conducting trend analysis, productivity analysis and earned value analysis.
- Established and enforced cost management procedures (Excel reports), embedding checks and balances on cost across various reports. Improved data control techniques and increased turnover of vendor data by 60%.
- Contributed, with client's construction team, to close out changes and ensure quality assurance through established procedures.
- Assessed budget variations and contingency allowances, including all changes to projects.

Project Services Analyst - Major and Minor Projects**October 2004 – November 2006****Project:**

- Encana / Cenovus Projects: Encana Foster Lake Greenfield Construction project valued at \$1 Billion.

Responsibilities:

- Reported to the Project Control Manager and was responsible to lead, supervise and manage quality control for the document control department.
- Created procedures for change management, value of work completed for projects.
- Supported Senior Project Controls Managers for production of executive summaries for reporting.
- Designed an Excel database for control of project drawings.

Cost Control & Pump Data Technician

www.nexeninc.com

*Nexen (formerly Canadian Occidental) is one of the largest Oil & Gas firms in Canada and a subsidiary of CNOOC.***Cost Control / Pump Data Technician - Operations****September 1999 – September 2000****Responsibilities:**

- Reported to the Production Manager, managed 2 staff and was responsible for the administration of ESP / Production data and streamlined tasks from 16 to less than an hour and increased turnaround by 10% by co-authoring the inventory database extracts in Excel.
- Sustained ESP database and administered ESP budget and expense and co-supervised pump repair shop and three ESP technicians.
- Negotiated business expectations, minimised shop operating costs through report management strategies.
- Designed production report management system by using excel visual basic macros, reduced generation time by 90%, and increased accuracy and effectiveness by 800%.
- Assessed project progress and enhanced engineering reports/charts from excel, oil field manager, access, crystal, and other software, cutting over 50 hours of work monthly.

Production Data Administrator - Production Engineering**September 1995 – August 1999****Responsibilities:**

- Reported to the Production Engineering Manager, managed 1 staff and was responsible to prepare periodic reports for management and track activity at production well sites, pipelines and facilities.
- Collation of production data and confirm pipeline / tank inventory production deliveries.
- Entry of data for well tests, inventories and sales into the production accounting system and review purchase orders and contracts.
- Collate, calculate, analyse volumetric data for wells, pumps, gathering systems, central processing facility.

Professional Data**Education**

- Bachelor of Commerce - Management Information Systems, **2000-2004, University of Calgary, Canada**
- Applied Project Management Certificate, **2007-2008, Southern Alberta Institute of Technology, Canada**

Professional Memberships

- Project Management Professional (PMP) Certified (since early 2011)
- Certified Cost Engineer (CCE), targeted from Assoc for Advancement of Cost Engineering) AACE, USA

Professional Development

- WHMIS, H2S Alive, Defensive Driving, Fire Fighting, Emergency Life Saving (CPR)

Languages

- Fluent English, Arabic, Hindi and Urdu

Computer Skills

- Advanced MS Office, Advanced Excel (including VBA), Advanced SAP (EPMS), SAP Hana, Teams, NextGen, MS Project, Sharepoint, P6, Tririga, OFM, MS Visio, SiteView, DocuShare, Bluebeam, Live Link, Aconex, FieldView, SQL, ASPEN, MySQL, Arena Simulation, MonteCarlo, Crystal Ball, Oracle 8i, Coldfusion etc.

Volunteer Experience

- Director, Management Information Systems Association, University of Calgary (UofC), 2004
- Vice President Information Systems, AIESEC Careers Day, UofC, 2002-2003
- Vice President Academic, Yemeni Students Association, UofC, 2001-2003
