

Syeda Adeela Sahar

📍 Dubai, UAE • 📞 (055) 6716123 • ✉ Adeelamohsin1@gmail.com & Mohsinzamirusa@gmail.com

Professional Summary:

Certified Database Administrator with 10+ years of experience managing and optimizing mission-critical databases in fast-paced environments. Proficient in Oracle, DB2, SQL Server, MySQL, skilled in database design, tuning, disaster recovery, and security best practices. Adept at automation and scripting.

Technical Skills

- Design & Implementation: designing and planning, hardening, migration and upgradation production/nonprod
- High Availability/DR: Always On Availability Groups, Log Shipping, Replication, Clustering
- Performance Tuning: execution plan analysis, indexing strategies, extended events, Query Tuning
- Backup & Recovery: Native SQL backups, SSIS, supporting scripts, third-party tools (IBM Spectrum Protect, Veeam)
- Monitoring Tools: SQL Server Profiler, ITM
- Scripting & Automation: T-SQL, SQL Server Agent jobs, PowerShell
- Security: RBAC, auditing, Transparent Data Encryption (TDE), security patching
- Cloud Platforms: Azure SQL Database, Azure Managed Instance, AWS RDS for SQL Server
- Compliance: HIPAA, GDPR best practices in database environments.

Certificates

- AWS Certified Cloud Practitioner 2022
- Microsoft Certified Azure Fundamentals AZ-900
- IBM Certified Database Administrator DB2
- IBM Certified Database Associates DB2,
- Microsoft: Certified Adminstrating SQL Server
- Microsoft SQL Server: Database Implementing a Data Ware House
- Microsoft: Certified Solution Associate, Certified Querying SQL Server
- Dell Technologies: Server Credential, Sales Converged Infrastructure

Awards

- > **IBM MEA Galaxy Program** Learning and innovation and selected for final phase in Dubai **2019**
- > **Certification of appreciation** in recognition of contribution towards the successful execution of **DU-Ignite project 2025**
- > **Certification of appreciation by IBM** to deliver Managed Services for smooth infrastructure delivery solution **2017**

Trainings

- Training and implement of MySQL
- Training on AIX from IBM
- Training on RedHat Linux 7.
- Oracle Database: SQL Fundamentals
- Oracle Database 12c Administrator Certified Associate
- Oracle Database Administrator Certified Professional (OCP)
- Oracle Apps DBA - E-Business Suite Release 12.2

Education:

- Masters in Software Engineering from KIET University, Pakistan
- Bachelors of science Computer Science (BCSC))from University Of Karachi, Pakistan

Professional Experience

Oracle Database Administrator

DU, Dubai, United Arab Emirates | Aug 2023 – Present

Currently working as Oracle Database Administrator as part of Cloud Implementation Team with infrastructure and Application Implementation teams to provide complete solution for Telecom services.

- Planned and executed database solutions across multiple telecom service projects, ensuring scalability, performance, and reliability.
- Implemented Oracle RAC and Data Guard for high availability and disaster recovery; conducted system hardening and advanced performance tuning.
- Developed and maintained automation and support scripts; managed backups, restorations, and post-deployment issue resolution (snag fixing).
- Administered Oracle environments for various telecom services including SMP, UCM, SOAB, GIS ENE, OS Assurance, Wincash, Eshop, Digital Factory, SRO, QA, NTS POS, and KUMCC, ICMDB, RAFM, WCS — both pre- and post-production/DR/NonProd/Dev.
- Designed and implemented syslog integration use cases, compliance VAPC reports and auditing strategies; conducted performance switchovers and managed load balancing within Oracle RAC clusters.

Manager Database

Zia Uddin Hospital, Karachi, Pakistan | Mar 2023 – Aug 2023

- Oracle E-Business suite 12.2 with Oracle 19.18.0. for hospital system,
- Automated routine database operations and daily administrative tasks to reduce manual intervention and increase operational efficiency.
- Performed server performance tuning and diagnostics to maintain optimal system health.
- Ensured robust backup strategies and tested restoration procedures to guarantee data protection and business continuity.
- Provided database support for outreach portals and cloud-based services running on MySQL and SQL Server.
- Configured and maintained Oracle E-Business Suite (EBS), including full disaster recovery (DR) setups to support enterprise resilience.

Database Specialist

Kyndryl, Karachi, Pakistan | Aug 2021 – March 2023

- Delivered database transformation and managed services for multiple clients across financial, food, and IT sectors, ensuring compliance, performance, and operational excellence.
- Led cross-functional coordination for service migrations between data centers, establishing robust, reliable environments with a focus on data integrity across LUW (Linux, Unix, Windows) platforms.
- Conducted high-impact migration activities and disaster recovery (DR) drills with minimal downtime, ensuring continuous application availability and business continuity.
- Developed and executed managed services contracts, aligning deliverables with client needs and leveraging advancements in modern database technologies.

Senior Database Administrator and lead

IBM, Karachi, Pakistan | Mar 2013 – August 2021

- Deployed and managed production environments for both financial and non-financial enterprise applications.
- Led infrastructure planning and capacity management using IBM SAN on Power Systems to ensure optimal storage allocation and performance within the enterprise network.
- Designed and implemented high availability (HA) and disaster recovery (DR) solutions, including DB2 PureScale, Oracle RAC, and Microsoft SQL Server clusters.

- Executed successful migrations from legacy systems to modern cloud-based platforms, improving scalability and resilience.
- Deployed IBM Spectrum Protect Suite for centralized backup and recovery operations across production environments, including SAP HANA and other critical applications.
- Translated customer requirements into architectural designs, producing both low-level and high-level documentation.
- Applied comprehensive security hardening techniques to align infrastructure with compliance and cybersecurity standards.

Database Administrator

Infini Logic, Karachi, Pakistan | Mar 2008 – April 2013

- Designed, coded, tested, and supported next-generation database solutions using SQL Server and MySQL across both Linux and Windows environments.
- Maintained data integrity and security, implemented replication for high availability (HA) and redundancy.
- Created detailed reports using various database tools and utilities.
- Managed automated backup strategies via custom scripts; ensured data recovery readiness.
- Monitored and optimized SQL queries and database performance; tuned indexes and queries to improve efficiency.
- Developed and maintained database maintenance plans, including backup routines and index maintenance (rebuilds and defragmentation).

Reference: Personal and Professional references and certificates will be available on request.
