Profile

Dedicated and performance-driven engineer with five years of extensive experience in the IT industry. Possesses strong expertise in TCP/IP, network management, and configuring Cisco routers, switches, and firewalls. Experienced in managing IP cameras and 3cx servers, with a proven track record of implementing and monitoring network security and connectivity. Seeking to leverage my IT expertise to make meaningful contributions to a forward-thinking organization.

Professional Experience

NAQDI Global, IT Support Specialist

08/2024 – 06/2025

Dubai, UAE

Key Responsibilities:

- Assisted the CTO in planning and executing IT infrastructure strategies.
- Configured routers, switches, and access points, managing VLANs, DHCP, and firewall settings to maintain secure and efficient network operations.
- Managed, configured, and monitored the 3CX server, GSM gateways, and Grandstream landlines, troubleshooting connectivity issues.
- Diagnosed and resolved technical issues related to ZK-Techo attendance devices, Printers, and IP cameras.
- Troubleshoot and resolved issues across computers, laptops, mini PCs, access points, and smart TVs.
- Troubleshoot and resolve Office 365 and CRM issues, user access, and system performance for enhanced productivity.
- Resolved network issues with a 92% success rate across three office locations supporting over 450 plus employees.
- Coordinated with Etisalat and DU for Leased line, PRI, and SIP trunk services, including managing service payments.
- Accountable for disaster recovery and business continuity as it relates to technology.

United Software and Technologies International, Network Engineer

08/2022 – 03/2024

Lahore, Pakistan

Key Responsibilities:

- Monitored and analyzed network performance using PRTG to ensure optimal uptime and rapid issue detection.
- Performed network configurations, system upgrades, and regular data backups.
- Maintained and updated IT inventory, providing management detailed resource reports.
- Configured Cisco routers, Catalyst switches, Huawei OLTs, and IP cameras.
- Implemented and managed L2, L3 protocols to ensure seamless network connectivity.
- Provided IT support by installing and configuring user computer systems, and responding to user requests.
- Assisted in planning, scheduling, and coordinating IT projects, while ensuring deliverables were met on time.

Multan Internet Service Providers Limited, Network Administrator

01/2020 – 06/2022

Multan, Pakistan

Key Responsibilities:

- Assisted the network engineer in troubleshooting LAN/WAN performance, connectivity, and other related network issues.
- Communicate with clients to identify and comprehend technical challenges, delivering concise, step-by-step guidance to troubleshoot and resolve issues.
- Managed inventory of hardware products and software licenses, ensuring accuracy and compliance with maintenance agreements.
- Provided fiber-cut ticketing support across multiple cities to promptly resolve connectivity issues.
- Diagnosed and resolved underground LAN cable issues using LAN testing tools to ensure uninterrupted network connectivity.
- Collaborated closely with colleagues to enhance security awareness and provided guidance to junior team members.
- Participated in monthly after-hours network maintenance.
