- **SDLC:** Agile methodologies, application rollouts, deployments, production support
- **Tools:** MS Office, Visual Studio, Eclipse, Oracle SQL Developer, MSSQL, Sublime-Text, WinSCP, Mantis, Postman, JBoss EAP, Putty, Jira, STS, SonarQube

PROFESSIONAL EXPERIENCE

Newgen Software Technologies Ltd. • Senior Software Engineer • Jun 2021 – Present

Al-Rajhi Bank , Riyadh, Saudi Arabia: Development Engineer at Al-Rajhi Bank, specializing in the Retail Module, based in Riyadh. Collaborate closely with teams including Al-Rajhi Bank core, Ejada System, T24 (Temenos), and Experian to meet business requirements. Focus on handling new demands, optimizing code, and ensuring system performance. Provide Level 3 support for production issues, working with teams to maintain seamless integration and functionality across components.

Bank of Baroda, India: Focused on digitizing the loan life-cycle management system, including MSME, CLOS, Collections and Recovery, and document management. Designed workflows based on Software Requirements Specifications (SRS), ensuring smooth data flow with server-side and client-side validations. Worked on data-saving mechanisms and integrations for user validation and authentication to enhance system efficiency.

Bank of Maharashtra., India: Core Developer for the MSME Module at Bank of Maharashtra, handling customer incident analysis, bug fixing, debugging, and release activities. Led the MSME module team, managing source code, estimating efforts for new requirements, and overseeing change requests, patch deployments, and product installations.

Key contributor to digitizing the loan life-cycle management system across Retail, MSME, Corporate, and Agriculture sectors, covering servicing, collections, recovery, and document management. Responsible for designing forms, performing validations, and ensuring seamless integration with third-party systems such as Core Banking, CIBIL Bureau, Karza Technologies API, and Aadhar Vault to enhance system efficiency and functionality

China Bank., Philippines : Implemented Business Process Management (BPM) for account opening, reducing approval time from days to minutes. Automation and standardization of processes led to lower account abandonment rates, increased customer satisfaction, and a rise in new applications. Additionally, this initiative resulted in a significant reduction of operational inefficiencies.

Rewards and Recognition

Pinnacle Performance: Designed and implemented prototypes for BOB MSME Digital Lending, including key portals and back-office processes. Successfully navigated challenges and secured sign-offs with a customer-centric approach.

Standing Ovation: Awarded for exemplary performance on the project.

Performer of the Quarter: Demonstrated leadership as Senior Software Engineer for the MSME module at Bank of Maharashtra. Addressed client issues, managed change requests, and led requirement gathering and documentation for new features.

High Five Award: Recognized for outstanding contributions in development and requirement gathering. Appreciated for dedication, attention to detail, and collaborative efforts that made a significant impact on project success.

PROFILE

Experienced Senior Software Engineer with 3.8 years in the software development life cycle, currently at Al Rajhi Bank, Saudi Arabia. Strong expertise in Java, JavaScript, SQL, and banking modules such as BPM, ECM, and CCM. Proficient with Newgen products (IBPS, OmniDocs, OmniScan) and skilled in secure coding practices and software development standards. Extensive experience in delivering end-to-end solutions, working with both microservices and monolithic architectures. Seeking to leverage technical expertise to contribute to the success of a forward-thinking organization.

Professional Expertise

- Strong technical and domain knowledge of banking applications and processes.
- Excellent problem-solving, communication, and interpretation skills.
- Experienced in development, Implementation, and providing support to QA teams for effective testing.
- In-depth understanding of banking components and their life cycle.
- Collaborative team player with a strong willingness to learn and adapt to new technologies.

EDUCATION

Bachelor's in Information Technology, Pune University, India, 2021.
