CAREER PROFILE

Expertise of over 5+years as a Mechanical Engineer by managing and executing complex engineering project, highly proficient in maintenance and inspection, quality assurance, procurement, risk assessment and mitigation, scheduling maintenance activities. Preparing technical reports, project documentation and updates for stakeholders with transparent communications. Gain advanced expertise in cutting-edge technologies and emerging trends through a Project Management Program

ACADEMIC QUALIFICATION

Jan 2024 • Continued	PGD in Project Management	NED University, Karachi
Dec 2015 • Aug 2019	BE Mechanical Engineering	NED University, Karachi

WORK EXPERIENCE

RBB Technician	Copperheat Saudia Arabia Company	(Dec 2024-Present)
- Performed 60+ ultrasonic (UT), magnetic particle (MP), dye penetrant (DPT), radiographic (RT), and phased array ultrasonic (PAUT) tests per month to detect material defects. - Collected and documented inspection data for 50+ components weekly, preparing detailed reports to ensure compliance with SAEP 1140, SAEP 1141, and SAEP 1142. - Assisted in calibrating NDT equipment weekly, ensuring 98% accuracy in defect detection. - Collaborated with senior engineers to resolve 20+ inspection issues, improving testing efficiency. - Ensured 100% compliance with safety regulations during all inspections. - Certified in SAEP 1141 Radiation Protection Permit (RPP), issued by Saudi Aramco (ID# PV018715, Pre-Approval ID# 204925467139) - Contributed to the Yaref Mega 2024 Turnaround (Oct–Dec 2024) as an NDT Technician, ensuring the maintenance and inspection of 200+ equipment for operational safety.		
Senior Executive Maintenance	Hilal Foods Limited	(Feb 2024- Dec 2024)
- Managed 30+ maintenance staff per shift, ensuring smooth plant operations. - Reviewed and delegated 50+ breakdown notifications daily through SAP, reducing downtime by 20%. - Maintained and submitted daily shift logs to the mechanical head, improving documentation efficiency. - Arranged spare parts for 100+ maintenance work orders monthly, optimizing spare part utilization. - Conducted 5S audits and ensured compliance in mechanical workshops. Toll Project with Mondelez International - Analyzed performance data from 10+ production lines, contributing to a 5% increase in efficiency. - Developed an Equipment Maintenance Control Program, reducing unexpected failures by 15%. - Created a food safety risk assessment plan to enhance production safety standards. - Designed a calibration matrix covering 100+ critical control devices for compliance. - Conducted a Lubricant Risk Assessment, ensuring machinery safety and longevity.		
Senior Executive Maintenance	Pakistan Cables Limited	(Oct 2021- Feb 2024)
- Lead a 15-member maintenance team, ensuring 100% machine uptime in a shift. - Supervised 5+ commissioning projects, collaborating with engineers for successful execution. - Managed spare part inventory for 80+ machines, streamlining corrective maintenance. - Implemented Predictive and Preventive Maintenance, reducing breakdowns by 30%. - Created and enforced machine cleaning and lubrication schedules, enhancing equipment life. - Conducted Root Cause Analysis (RCA) for 10+ critical failures, minimizing reoccurrence. - Oversaw maintenance of key cable manufacturing machines, including: Up Cast Copper Rod Plant (CRP), Down Cast Copper Rod Plant (CCR), PVC Compound, Drawing Machine, Bunching Machine, Extrusion Lines, Stranding and Twisting Machine.		

- Planned and executed Preventive Maintenance for 20+ machines, reducing breakdowns by 25%.
- Managed SAP PM module for tracking 300+ work orders, improving maintenance scheduling.
- Conducted Predictive Maintenance for critical machines, preventing unexpected failures.
- Take part in the erection of 2 new production lines, collaborating with international firms:
- Cake Line Installation (GEA IMAFORNI, TONELLI GROUP, METRA GROUP, EUROSICMA)
- NOVITA Wafer Line 3 (FRANZ HAAS, EUROSICMA)
- Performed Atlas Copco Compressor (GA75VSD, GA75+FSD, GA45VSD) maintenance, ensuring continuous plant operations.

JAPANESE STANDARD & SKILLS: SAP S/4 HANA | AutoCAD | Primavera P6 | Solid Edge | Oracle E-Business Suite |
Kaizen Activity | 5S Work

PERSONAL PROJECTS:

- Completed FYP Designed, Modeled and Fabricated a 600- Watt horizontal Axis Hydro- Kinetic Turbine (09/2018 - 08/2019)
- Took participation in Dice Water & Energy Competition organized by Dice Foundation USA and made a prototype of 12Watt Vortex Hydro Power Plant. (06/2018 - 07/2018)
- Design a prototype Bio-gas plant to produce biogas on a small scale under District Municipal Corporation Central Karachi (DMC) (05/2017 - 08/2017)

ACHIEVEMENTS:

- Non-destructive testing methods (NDT process) from UDEMY Apr-2024
- Project Management Essentials (PMP)- Successfully completed Project Management Skills from Management & Strategic Institute.
