InCred: Basic HS Credential Evaluation

This document was prepared for: York University

11/8/24

Applicant's Full Name: Tinotenda Rande

InCred APP#: 169818

Date of Birth: July 22, 1999

Country of Education: Zimbabwe

High School / Secondary School

Name of Institution: Dewure High School

Location of Institution: Gutu

Secondary Certificate or Diploma Earned: Zimbabwe General Certificate of Education at Ordinary Level (O-Levels); Zimbabwe General Certificate of Education Advanced Level (A-Levels)

U.S. Comparability: High School Diploma with advanced academic coursework

Month/Year Earned: November 2016; November 2018

High School Timeline: The student completed the required five or more O-Level subject examinations at the end of four years of lower secondary school in the fall of 2016. The student then completed two years of academic upper secondary coursework.

Quality of Grades in Indigenous Terms:

✓ **Superior**

Above Average

Slightly Above Average

Average

Below Average

Cumulative U.S. Converted GPA: 3.56

Grading Scale Used:

Indigenous:

U.S. Grade:

A (1-2)	A
B (3-4)	B
C (5-6)	C
D, E (7-8)	D
U (9)	F

Recommended Advanced Standing Credits*: Up to 30 credits for A-Levels

**This is a recommendation for university-level credits that could be awarded for work done while in high school or secondary school.*

Summary: The student completed the required five or more O-Level subject examinations (or equivalent qualifications), reaching a level of education comparable to earning a high school diploma, which completes mandatory secondary education. In addition, the applicant completed two years of academic advanced secondary coursework, for which advanced standing credit is recommended.

Explanatory Notes:

InCred provides reliable, accessible credential evaluations through a one-stop-shop for eligibility and credential evaluations, bringing together the eligibility and admissions processes for international student-athletes.

This evaluation is based on the information provided by the student. Should additional information be discovered, this can change the nature of the evaluation. Additional costs are associated with additional educational information not provided at the time of the original evaluation.

A credential evaluation indicates a suggested comparability to the U.S. educational system. Institutions can apply their own policies and are not obligated to award comparability in the exact same fashion as the credential evaluation.

Cumulative Grade Point Average:

High school / secondary grade point averages are calculated as indicated in the NAIA Published Standards for international academic standards (<http://www.playnaia.org/page/intldirectory.php>), created in consultation with the International Student Records Advisory Committee (ISRAC). The NAIA uses cumulative grade scores and whenever possible relies on the indigenous cumulative high school calculation and then converts to the U.S. comparable grade average. When not available, individual grades are converted line-by-line to formulate a cumulative high school grade average.

University grade averages are computed based on the school's cumulative grade average when available, otherwise it is calculated line-by-line or by finding the indigenous grade average and converting that to the U.S. comparable grade average.

Calculating Credit Conversions:

Transfer credit from international universities that are determined to be comparable to regionally accredited U.S. institutions are converted to U.S. comparable credits to apply NAIA transfer student rules. Credits from institutions not considered comparable to US regionally accredited institutions do not count as transfer credits or apply towards credits earned in the eligibility process. The NAIA converts international credits based on the notion that a full U.S. course load is approximately 30-36 U.S. semester credits for one year (or roughly 15-18 credits per semester). One year of attendance at an international university or post-secondary institution counts as two semesters or three quarters for the purposes of computing the duration of eligibility. After the credits are converted, the NAIA Eligibility Center determines for how many semesters (quarters) the student identified (either through intercollegiate athletics or through enrollment in sufficient course load), resulting in a determination of how many "Terms of Attendance" a student has used and thus has remaining (students have 10 semesters or 15 quarters of attendance).

Available vs. Applicable Credit

Available credit represents credits that meet the NAIA definition of institutional credit for the purposes of eligibility rules, but applicable credit indicates the reviewer's recommendation for acceptance of transfer credit.
