Summary

Senior QC Inspector | Aramco Approved | Civil Engineer

With 8 years of experience in construction and quality control, I specialize in oil & gas pipelines, infrastructure, and development projects, including housing, power plants, water treatment, solar, and smelting operations. I have a proven record in inspections, ensuring compliance with Aramco and international standards, with a focus on quality, safety, and operational excellence. Ready to contribute as a QC Inspector or QC Supervisor to your organization's success.

DASU, Pakistan

July 2013–Nov 2014

Detail job responsibilities in Quality Discipline

- Oversee multiple projects across various scopes, including Oil & Gas Infrastructure, power plant substations, solar plants, transmissions line underground utilities, tanks, and precast works,
- QC professional with expertise in inspecting and testing materials, equipment, and processes to ensure compliance with Aramco standards and international norms (ASTM, ISO, ACI), ensuring consistent project quality."
- Prepare and submit comprehensive inspection and test reports to clients, stakeholders, and project teams.
- Ensure all procedures and deliverables comply with the approved Project Quality Control Plan (PQP), meeting both client requirements and industry standards.
- Coordinate with third-party testing agencies and accredited laboratories for quality verification and compliance.
- Identify, document, and report non-conformances, driving corrective and preventive actions as necessary.
- Ensure proper calibration and functionality of inspection tools and equipment, including survey instruments and third-party devices.
- Provide guidance to project teams on quality standards, regulatory compliance, and industry best practices, promoting a culture of quality assurance.
- Participate in toolbox talks, training, and workshops to enhance quality awareness across teams.
- Assist in internal and external audits, ensuring compliance with client-specific quality management systems (QMS).
- Manage material traceability and maintain detailed documentation in line with project requirements.
- Liaise with civil testing agencies and batching plants to ensure timely delivery and quality control of materials, including concrete.
- Review FDT & CST reports from third-party agencies before Aramco submission and update the master log accordingly.
- Assist the QC Manager in implementing the Contract Management System, ensuring that all key processes comply with contractual obligations.
- Monitor inspection and testing status, ensuring non-conformities are tracked in the Internal Non-Conformity Report (INCR).
- Review construction drawings, inspect materials, and conduct daily surveillance to ensure compliance with project standards.
- Evaluate civil documentation (QCPs, Method Statements, Batch Plant documentation, TPCTL, etc.) for compliance with technical specifications and regulatory standards.
- Review and approve contractor submittals, ensuring all materials meet required specifications.
- Control non-conforming products by identifying, marking, and isolating them to prevent unauthorized use or delivery.
- Identify non-calibrated equipment and liaise with the concerned parties to facilitate timely calibration.
- Collaborate with clients, project execution teams, and engineering departments, attending QC meetings and reviewing procedures for compliance.

- Review construction documents for discrepancies and coordinate with the Resident Engineer to implement corrective actions.
- Promote continuous improvement through training and workshops, enhancing quality control skills and knowledge.
- Collaborate effectively across engineering, production, and management teams to drive quality initiatives and ensure compliance.
- Liaise with project management to ensure that all quality control requirements are met in a timely and efficient manner, addressing any issues as they arise.
- Implement and maintain effective quality control systems, promoting compliance with Aramco's policies and international standards across all project stages

Detail job responsibilities & Experience in construction execution

- site supervisor working under the guidance of senior engineer, I track project costs, allocate resources, and oversee material procurement to support financial efficiency. I prepare and submit daily progress reports (DPR) to keep the team informed. My role involves following instructions and advice from the civil engineer to ensure smooth operations on-site.)
- Oversee all aspects of construction projects on-site, ensuring compliance with design specifications and safety regulations.
- Coordinate daily site activities and assignments to ensure effective workflow and productivity.
- Manage and supervise construction crews and subcontractors to ensure adherence to project schedules and budgets.
- Conduct regular site inspections to monitor progress, assess materials and equipment conditions, and ensure quality control.
- Prepare and maintain project documentation, including reports on site progress, incidents, and resolutions of issues.
- Communicate regularly with project managers and stakeholders to provide updates and address any concerns regarding project timelines or deliverables.
- Implement safety protocols and lead safety meetings to foster a culture of safety on-site.
- Regulatory Compliance Knowledgeable in local and federal regulations affecting construction projects, ensuring all work complies with legal requirements.

Skills

- Quality Documentation Management: Maintain RFI, FDT, CST, and material logs, ensuring compliance through regular reviews.
- Technical Expertise & Leadership: Apply civil engineering principles and lead quality control processes.
- Reporting & Communication: Deliver clear, detailed reports on quality concerns, resolutions, and progress.
- Proactive Quality Management: Identify and resolve quality issues, ensuring defect-free deliverables.
- Focus Assessment: Conduct thorough assessments to monitor quality performance and ensure continuous improvement.
- Organizational & Time Management Skills: Efficient in managing tasks and utilizing CAD and MS Office for process optimization.
- Client Relationship Management: Foster strong client relationships, ensuring high-quality results and satisfaction.
