ABOUT ME

With over 10 years of experience in Information Technology in Saudi Arabia, I bring a deep understanding of the local market, customer needs, and industry trends. Holding a Master's in Information Technology, I possess a robust skill set in software development, project management, and team leadership. My expertise spans full-stack development, software architecture, agile methodologies, and DevOps. Currently at Nokia, I lead high-profile projects, collaborating with cross-functional teams to deliver innovative solutions that consistently exceed customer expectations. My ability to communicate complex technical concepts simply and effectively has been key in fostering strong client relationships and driving business growth. A proactive learner, I stay abreast of the latest technologies and industry best practices. I am also passionate about mentoring and empowering team members to reach their full potential. If you seek a dedicated professional to elevate your projects, I'm here to help.
