Cell & Whatsaap # +92 334 7778607/+966 501405349

PERSONAL PROFILE:

- Highly Professional Engineer with 05 years of experience in Production and Production Planning & Control with good analytics and expertise of inventory management, planning & scheduling and material requirement planning (MRP).
- Proficient at provision of technical feasibility for future business. Result oriented professional who is able to integrate material, resources and methods to produce product with optimum quality.
- Possess proven track record of process improvisations and material saving activities leading lower production costs.
- Capable of leading teams and to add value, reduce costs and improve operational performances. Excels at collaborating across departments with cross-functional teams to achieve overall efficiency at workplace

EDUCATION:

- **Bachelors of Engineering (Mechanical Engineering) CGPA-3.44 "B⁺"**
The University Of Lahore -October-2018

Final Year Project

Design and manufacturing of Electrotherm Induction Furnace. Design and manufacturing of Parkinson Gear Tester.

Other Projects

Manufacturing of Path Following Robot system.

- **Intermediate Fsc (Pre Engineering) 758/1100 "B"**

B.I.S.E

Bahawalpur (2014)

Major Courses

Physics, Mathematics, Chemistry

- **Matriculation (Computer Science) 816/1050 "A"**

B.I.S.E Bahawalpur (2012)

Major Courses

Physics, Mathematics, Chemistry, Computer Science

PROFESSIONAL EXPERIENCE

❖ Riyadh Steel Co.

Billet Inspection AM April 2023- May 2024

❖ Razaque Steels (Pvt.) Ltd.

Working as:

- Mechanical Trainee Engineer / Jan 2019 - Jan 2020
- Supervisor Engineer / Feb 2020 – Jan 2023

❖ Responsibilities/Accomplishments:

- Supervise the 15 ton Electrotherm Induction Furnace.
- Supervise the Continuous Casting Plant.
- Supervise the Fil-tech Scrober Plant.
- Planning, direction and co-ordination of all the manufacturing processes.
- Research about the tools, methodologies and processes and find out solutions to improve production efficiency.
- Suggest recommendations on the manufacturing quality control processes, types of manufacturing methods to be adopted.
- Responsible for checking composition of Melting material by spectrometer and maintaining it by alloying addition.
- Billet composition check by spectrometer.
- Responsible for maintaining Grades.
- Supervise the Scrap Yard Quality and Quantity.

LANGUAGES

- ❖ Urdu- Advanced
- ❖ English- Intermediate
